Oracle WebCenter Content 11g: Content Server Administration

Duration: 5 Days

What you will learn

This Oracle WebCenter Content 11g: Content Server Administration training helps you develop a conceptual understanding of the behind-the-scenes process for managed content. Expert Oracle University instructors will teach you how to configure Webcenter Content Server, which includes implementing security and metadata models and creating content review processes.

Learn To:

Implement a security model.
Create custom pages using rules and profiles.
Implement a metadata model.
Migrate content server configurations.
Create automatic content review processes.
Replicate content.

Benefits to You

By investing in this course, you will develop the knowledge and skills to batch content into the content server. You'll walk away with the ability to migrate configurations and content as well. The lesson topics are reinforced with structured hands-on practices. Through pushing yourself to expand your capabilities, you'll form an important foundation of knowledge that can help you become a content server administrator.

Please Note

This offering is based on Oracle WebCenter Content 11g (11.1.1.8.0). This course does not cover installation.

Audience
Application Developers
Database Administrators
Functional Implementer
Support Engineer
System Analysts
Technical Consultant
Web Administrator

Related Training

Suggested Prerequisites

Oracle WebLogic Server 11g: Administration Essentials

Set up security and metadata models

Configure general System Properties for contribution, such as automatic assignment of Content ID on check in

Enable components that offer specialized functions or efficiencies

Contribute content using WebDAV and the Batchloader administrative applet

Create workflows to represent a formal approval process for content checked into the content server

Manage content subscriptions

Use Archiver to export, import, and replicate content, to update metadata and to create back-ups

Manage multiple servers using the Configuration Migration Utility and Archiver Table Replication to synchronize system configurations

Course Topics

Webcenter Content Server Overview
WebCenter Content Overview

Webcenter Content Server End-User Skills
Personalizing Oracle WebCenter Content Server
Contributing Content
Searching and Subscribing to Content
Revising Content

Implementing Security
Understanding Administrative Responsibilites
Implementing a Role-Based Security Model
Implementing an Account-Based Security Model

Implementing a Metadata Model
Understanding Content Types
Understanding Custom Metadata
About Dependent Choice Lists
Managing Metadata using Rules
Using Profiles to Customize Content Pages

Configuring Webcenter Content Server
Configuring Webcenter Content Server using Administration Tools
Configuring Webcenter Content Server using Components

Configuring Webcenter Content Server for alternative methods of contribution and performing mass contribution

Configuring Webcenter Content Server for WebDAV/Desktop Integration Suite
Contributing Mass Content using Batch Loader

Workflows
Explaining Workflow Concepts
About Criteria Workflows
Extending Workflows
Discussing BPEL Integration

Managing Content
Managing Content and Subscriptions
Using Folios and Folio Administration
Updating Mass-Metadata and Creating Backups

System Migration
About Configuration Migration Utility (CMU)
About Export, Import and Replication or Transfer of Content
