WMS: FUNDAMENTALS

Do you need to learn how to manage your organization's NetSuite WMS account? If so, this course will provide you with the foundational knowledge needed to setup, maintain and utilize your NetSuite solution.

WMS: Fundamentals examines the foundational knowledge needed to configure and utilize NetSuite for your organization by examining key tasks and responsibilities for the warehouse administrator, inventory manager and warehouse operator.

The course begins with a high-level introduction of NetSuite WMS capabilities before turning to the setup, configuration and daily processing tasks.

Demonstrations will be conducted in a NetSuite WMS account.

Key Tasks
How do I:

- Establish baseline knowledge of NetSuite WMS functionality?

- Confirm NetSuite WMS configuration settings?

- Use NetSuite WMS on my RF mobile handheld scanner to:

  - Perform inbound processes, including receiving orders and putaway items?

  - Perform outbound process for fulfilling orders?

  - Manage my inventory?

  - Process work orders?

ORACLE
NETSUITE

Who Should Attend

Warehouse administrators and inventory managers who need to understand the features and capabilities of the NetSuite WMS solution.

New and experienced administrators and business process owners who are responsible for the day-to-day operations, maintenance and optimization of their organization's NetSuite account.

Prerequisites

Prior completion or the equivalent knowledge of NetSuite Essentials or relevant Industry Fundamentals course is recommended.

Course participants should be familiar with NetSuite navigation and features. To learn how to navigate NetSuite and perform common tasks, view the Getting Started tutorials on SuiteAnswers.

Agenda
