

CompTIA A+ Core 1 (220-1001) and Core 2 (220-1002)

Table of Contents

PART I: INTRODUCTION TO CORE 1 (220-1001)

Core 1 (220-1001) Domain 1.0: Mobile Devices

Chapter 1 Laptops, Part 1

1.1 — Given a scenario, install and configure laptop hardware and components

Keyboards

Touchpad

Hard Drives

Memory

Smart Card Readers

Optical Drives

Communications

Video

Power

Speaker

System Board and CPU

Fans

Chapter 2 Laptops, Part 2

1.2 — Given a scenario, install components within the display of a laptop

Display Types

Inverter and Backlight

Digitizers and Touchscreens

Webcam and Microphone

Wi-Fi Antenna Connector and Placement

1.3 — Given a scenario, use appropriate laptop features

Special Function Keys

External Monitors

Docking Stations and Port Replicators

Rotating and Removable Screens

Securing Laptops with Cable Locks

Chapter 3 Smartphones, Tablets, and Other Mobile Devices, Part 1

1.4 — Compare and contrast characteristics of various types of other mobile devices

Tablets

Smartphones

Wearable Technology Devices

E-readers

GPS Devices

1.5 — Given a scenario, connect and configure accessories and ports of other mobile devices

Connection Types

Accessories

Chapter 4 Smartphones, Tablets, and Other Mobile Devices, Part 2

1.6 — Given a scenario, configure basic mobile device network connectivity and application support

Enabling Wireless Functions

USB Tethering

Bluetooth

E-mail Configuration

Cellular Radio Technologies

1.7 — Given a scenario, use methods to perform mobile device synchronization

Synchronization Methods

Types of Data to Synchronize and Authentication

Core 1 (220-1001) Domain 2.0: Networking

Chapter 5 Ports, Protocols, and Network Devices

2.1 — Compare and contrast TCP and UDP ports, protocols, and their purpose

TCP vs. UDP

Ports and Protocols

2.2 — Compare and contrast common networking hardware devices

Switches

Routers

Wireless Access Points

Firewalls

Network Interface Cards

Cloud-based Network Controllers

Repeaters

Hubs

Cable/DSL Modems

Bridges

Patch Panels

Power over Ethernet

Ethernet over Power

Chapter 6 SOHO Networks and Wireless Protocols

2.3 — Given a scenario, install and configure a basic wired/wireless SOHO network

Router Setup and Wireless

Access Point Settings

NIC and End-user Device Configuration

IoT Device Configuration

Cable/DSL Modem Configuration

Firewall Settings and Additional Configurations

Configuring Wireless Encryption

2.4 — Compare and contrast wireless networking protocols

802.11 Wireless

RFID

Zigbee and Z-Wave

Chapter 7 Networked Hosts and Network Configuration

2.5 — Summarize the properties and purposes of services provided by networked hosts

Server Roles

Internet Appliances

Embedded/Legacy Systems

2.6 — Explain common network configuration concepts

Configuring IPv4

Configuring IPv6

VLANs

VPNs

Chapter 8 Network Types and Networking Tools

2.7 — Compare and contrast Internet connection types, network types, and their features

Network Types

Internet Connection Types

2.8 — Given a scenario, use appropriate networking tools

Network Cabling Tools

Wi-Fi Analyzers

Core 1 (220-1001) Domain 3.0: Hardware

Chapter 9 Cables and Connectors

3.1 — Explain basic cable types, features, and their purposes

3.2 — Identify common connector types

Network Cables

Video Cables and Connectors

Multipurpose Cables and Connectors

Hard Drive Cables and Connectors

Adapters

Chapter 10 RAM and Storage

3.3 — Given a scenario, install RAM types

RAM Types

Installing RAM

RAM Technologies

3.4 — Given a scenario, select, install and configure storage devices

SATA

Magnetic Hard Drives

Solid-State Drives

RAID

Flash

Optical Drives

Chapter 11 Motherboards and Add-on Cards

3.5 — Given a scenario, install and configure motherboards, CPUs, and add-on cards

Motherboard Form Factors and Connectors

Expansion Cards

More Ports and Connectors

BIOS/UEFI Settings

The POST

Chapter 12 CPUs

3.5 — Given a scenario, install and configure motherboards, CPUs, and add-on cards

CPU Features

CPU Compatibility

Power Consumption

Cooling Mechanisms

Installing CPUs

Chapter 13 Peripherals and Power

3.6 — Explain the purposes and uses of various peripheral types

Input Devices

Output Devices

Hybrid I/O Devices and Others

3.7 — Summarize power supply types and features

Planning Which Power Supply to Use

Installing the Power Supply

Chapter 14 Custom PCs and Common Devices

3.8 — Given a scenario, select and configure appropriate components for a custom PC configuration to meet customer specifications or needs

Graphic/CAD/CAM Design Workstation

Audio/Video Editing Workstation

Virtualization Workstation

Gaming PC

Network-Attached Storage Device

Thin Client

Standard Thick Client

3.9 — Given a scenario, install and configure common devices

Desktop Devices and Settings

Laptop Configurations and Settings

Chapter 15 Printers and Multifunction Devices

3.10 — Given a scenario, configure SOHO multifunction devices/printers and settings

Printer Configuration Settings

Local Versus Network Printers

3.11 — Given a scenario, install and maintain various print technologies

Types of Printers

Virtual Printing

Printer Installation and Drivers

Core 1 (220-1001) Domain 4.0: Virtualization and Cloud Computing

Chapter 16 Cloud Computing and Client-side Virtualization

4.1 — Compare and contrast cloud computing concepts

Common Cloud Models

Cloud Computing Concerns

4.2 — Given a scenario, set up and configure client-side virtualization

Purpose of Virtual Machines

Hypervisors

Examples of Virtual Machine Software

Virtual Machine Requirements

Core 1 (220-1001) Domain 5.0: Hardware and Network Troubleshooting

Chapter 17 Computer Troubleshooting 101

5.1 — Given a scenario, use the best practice methodology to resolve problems

Step 1: Identify the Problem

Step 2: Establish a Theory of Probable Cause (Question the Obvious)

Step 3: Test the Theory to Determine Cause

Step 4: Establish a Plan of Action to Resolve the Problem and Implement the Solution

Step 5: Verify Full System Functionality and, If Applicable, Implement Preventive Measures

Step 6: Document Findings, Actions, and Outcomes

Chapter 18 Troubleshooting Motherboards, CPUs, RAM, and Power

5.2 — Given a scenario, troubleshoot problems related to motherboards, RAM, CPUs, and power

Troubleshooting Motherboards

Troubleshooting CPUs

Troubleshooting RAM

Troubleshooting Power Supply Issues

Heating and Cooling

Chapter 19 Troubleshooting Hard Drives and RAID Arrays

5.3 — Given a scenario, troubleshoot hard drives and RAID arrays

Troubleshooting Hard Drives

Troubleshooting RAID Arrays

Chapter 20 Troubleshooting Video Issues and Mobile Devices

5.4 — Given a scenario, troubleshoot video, projector, and display issues

Video Troubleshooting

5.5 — Given a scenario, troubleshoot common mobile device issues while adhering to the appropriate procedures

Mobile Device Display Troubleshooting

Mobile Device Overheating

More Mobile Device Troubleshooting

Disassembling Processes for Proper Reassembly

Chapter 21 Troubleshooting Printers

5.6 — Given a scenario, troubleshoot printers

Troubleshooting Printers

Print Jobs and the Print Spooler

Chapter 22 Troubleshooting Wired and Wireless Network Problems

5.7 — Given a scenario, troubleshoot common wired and wireless network problems

Troubleshooting Common Symptoms

PART II: INTRODUCTION TO CORE 2 (220-1002)

Core 2 (220-1002) Domain 1.0: Operating Systems

Chapter 23 Operating System Types and Windows Versions

1.1 — Compare and contrast common operating system types and their purposes

Workstation Operating Systems

32-Bit Versus 64-Bit

Smartphone and Tablet Operating Systems

Spire.PDF

Free version is limited to 10 pages of PDF. This limitation is enforced during loading and creating files.
When converting PDF to Image, the first 3 pages of PDF files will be converted to Image format successfully.
