# Contents

## **1 Siebel Tools: Course Introduction**

- Lesson Agenda 1-2
- Instructor and Class Participants 1-3
- Training Site Information 1-4
- Course Audience 1-5
- Course Prerequisites 1-6
- Course Goal 1-7
- Course Objectives 1-8
- Course Methodology 1-9
- Course Materials 1-10
- Information Sources 1-11
- Course Agenda 1-12

## **2 Configuring a Siebel Application**

- Objectives 2-2
- Siebel Customer Relationship Management (CRM) 2-3
- Siebel CRM Applications 2-4
- Comparison of Siebel CRM Applications 2-5
- Configuring a Siebel Application 2-6
- Siebel Tools 2-7
- The Repository and Siebel Tools 2-8
- Siebel Repository File 2-9
- Object Definitions 2-10
- User Interface Layer 2-12
- Tailoring the Logical User Interface 2-13
- Business Layer 2-14
- Tailoring the Business Layer 2-15
- Data Layer 2-16
- Extending the Data Layer 2-17
- Basic Configuration Steps 2-18
- Create or Edit Object Definitions 2-19
- Compile the Edited Object Definitions 2-20
- Test the Modifications 2-21
- Lesson Highlights 2-22
- Practices 2-23

### **3 Using a Local Development Environment**

- Objectives 3-2
- Siebel Application Development 3-3
- Create a Separate Development Environment 3-4
- Creating a Local Developer: Overview 3-5
- Repositories 3-6
- Develop on the Local Repository 3-7
- Projects 3-8
- Assigning Object Definitions to Projects 3-9
- Viewing Object Definitions by Project 3-10
- Check Out/Check In Mechanisms 3-11
- Copying Projects 3-12
- Getting Projects 3-13
- Checking Out a Project 3-14
- Check Out a Project 3-15
- Checking In a Project 3-16
- Check In a Project 3-17
- Canceling Check Out 3-18
- Project Differences 3-19
- Undoing a Check Out 3-20
- Undo Check Out 3-21
- Object Check Out/Check In (COCI) 3-22
- Checking Out an Object 3-23
- Using Object COCI 3-24
- Disabling Object COCI 3-25
- Creating New Projects 3-26
- Create a New Project 3-27
- Locking Projects 3-28
- Locking Projects Locally 3-29
- Do Not Lock Projects on the Server 3-30
- Developing a Proof of Concept 3-31
- Lesson Highlights 3-32
- Practice 3-33

### **4 Editing and Compiling Object Definitions**

- Objectives 4-2
- Editing An Object Definition 4-3
- Creating a New Object Definition 4-4
- Symbolic Strings 4-5
- Using Symbolic Strings 4-6

- Changed Flag 4-7
- Validation 4-8
- Validating an Object Definition 4-9
- Compiling 4-10
- Compiling Projects 4-11
- Compiling Object Definitions 4-12
- Rapid Unit Testing 4-13
- Auto-starting the Web Client 4-14
- Debug Settings 4-15
- Basic Configuration Strategy 4-16
- Recommendations: Object Definitions 4-17
- Recommendations: Projects 4-18
- Lesson Highlights 4-19
- Practices 4-20

## **5 Managing Object Definitions**

- Objectives 5-2
- Archiving Object Definitions 5-3
- Exporting Object Definitions 5-4
- Importing Object Definitions 5-5
- Conflict Resolution 5-6
- Resolve Import Conflicts 5-7
- Importing Multiple Archive Files 5-8
- Source Code Control Integration 5-9
- Backing Up 5-10
- Comparing Object Definitions 5-11
- Compare Objects 5-12
- Inspect Differences 5-13
- Compare Two Object Definitions 5-14
- Inspect Differences 5-15
- Planning 5-16
- Implementing 5-17
- Lesson Highlights 5-18
- Practice 5-19

## **6 Siebel Web Templates**

- Objectives 6-2
- Siebel Web Template Files 6-3
- Siebel Tags 6-4
- Web Template Explorer 6-5
- Siebel Web Template Files 6-6

- Siebel Open UI Web Template Files 6-7
- Configure Siebel Tools to use Open UI Web Templates 6-8
- Cascading Style Sheets (.css files) 6-9
- Using Web Template Files 6-10
- Web Template Object Definition 6-11
- Types of Web Templates 6-12
- Form Applet Web Templates 6-13
- List Applet Web Templates 6-14
- Applet Web Templates 6-15
- View Web Templates 6-16
- Web Page Web Templates 6-17
- Container Page 6-18
- Working with Web Templates 6-19
- Assigning a Web Template to a View 6-20
- Example: Assigning a Web Template to a View 6-21
- Assigning Components in a View or Applet 6-22
- Mapping Information 6-23
- Example: Assigning Applets in a View 6-24
- View Web Template Items 6-25
- Summary of Object Types 6-26
- Lesson Highlights 6-27
- Practice 6-28

## **7 Configuring Form Applets**

- Objectives 7-2
- Applet 7-3
- Common Applet Types 7-4
- Applet Properties 7-5
- Editing Properties 7-6
- Controls for Form Applets 7-7
- Expanding and Collapsing Form Applets 7-8
- Control Object Definitions 7-9
- Web Templates for Form Applets 7-10
- Grid Layout Editor 7-12
- Grid Layout Editor: Additional Operations 7-13
- Web Controls Palette 7-14
- Creating a Form Applet 7-15
- Form Applet Wizard Inputs 7-16
- Form Applet Wizard 7-17
- Grid Layout Editor 7-18
- Show More Mode 7-19

Enabling Show More 7-20  
Summary of Object Types 7-21  
Lesson Highlights 7-22  
Practice 7-23

## **8 Configuring List Applets**

Objectives 8-2  
List Applets 8-3  
List Object Definition 8-5  
List Column Object Definitions 8-6  
Control Object Definitions 8-7  
List Applet Web Templates 8-8  
List Applet Modes 8-9  
Base and Edit Modes 8-10  
Applet Web Layout Editor 8-11  
Show in List Property 8-12  
Number of Rows Displayed 8-13  
Show More Button 8-14  
Creating a List Applet 8-15  
List Applet Wizard Inputs 8-16  
List Applet Wizard 8-17  
Web Layout Editor 8-18  
Applet Web Template 8-19  
List Column Definitions 8-20  
Summary of Object Types 8-21  
Lesson Highlights 8-22  
Practice 8-23

## **9 Configuring Views**

Objectives 9-2  
View 9-3  
View Web Templates 9-4  
Applets in View Web Templates 9-5  
Identifying the View Web Template 9-6  
Identifying Applets Assigned to a View 9-7  
Web Layout Editor 9-8  
Preview Mode 9-9  
Creating a View 9-10  
Inputs for the View Wizard 9-11  
View Wizard 9-12  
Web Layout Editor 9-13

Adjust the Applet Mode 9-14  
Additional Steps After Configuring a New View 9-15  
Administering a New View in the Client 9-16  
1. Register the View 9-17  
2. Assign the View to a Responsibility 9-18  
Summary of Object Types 9-19  
Lesson Highlights 9-20  
Practice 9-21

## **10 Configuring Applications and Screens**

Objectives 10-2  
Application 10-3  
The Container Page 10-4  
Acknowledgement Web Page/View 10-5  
Additional Web Pages 10-6  
Application-Level Menus 10-7  
Toolbars 10-8  
Toolbars for an Application 10-9  
Screen Tabs 10-10  
Site Map Links 10-11  
Screens and Views 10-12  
Views for a Screen 10-13  
Screen View Types and Categories 10-14  
Aggregate Category 10-15  
Aggregate View 10-16  
Detail Category 10-17  
Detail View 10-18  
Assigning a View to a Screen 10-19  
Specifying the Default View for a Screen 10-20  
Summary of Object Types 10-21  
Lesson Highlights 10-22  
Practices 10-23

## **11 Business Components and Joins**

Objectives 11-2  
Business Components 11-3  
Business Component (BC) 11-4  
Business Component Properties 11-5  
Base Table 11-6  
SVFs That Map to a Base Table 11-7  
Mapping a Field to a Column in a Base Table 11-8

Type Property for Fields	11-9
Default Single Value Fields	11-10
Joined Tables	11-11
Joining Data from Related Tables	11-12
Explicit Join	11-13
Join Definition	11-14
Outer Join Flag	11-15
Outer Join Example	11-16
Join Specification	11-17
Fields That Map to a Joined Table	11-18
Mapping a Field to a Column in a Joined Table	11-19
1. Determine if a Join Definition Already Exists	11-20
2. Create a Join	11-21
3. Create the Single Value Field	11-22
1:1 Extension Table	11-23
Implicit Joins	11-25
SVFs That Map to an Extension Table	11-26
Creating a New Business Component	11-27
Business Component Wizard Inputs	11-28
Business Component Wizard	11-29
Configuring a New Business Component	11-30
Summary of Object Types	11-31
Lesson Highlights	11-32
Practice	11-33

## **12 Party Business Components**

Objectives	12-2
Party Data	12-3
Party Business Components	12-4
S_PARTY	12-5
Benefits of the Party Data Model	12-6
Commonly Used Party Business Components	12-7
S_PARTY and Its Extension Tables	12-8
Person-Related Party Business Components	12-9
Organization-Related Party Business Components	12-11
Party Business Components for Access Control	12-13
Groupings for Access Control	12-14
S_PARTY_PER	12-15
Role of Joins in Party Data	12-16
Mapping Fields in Party Business Components	12-17
Joining Party Data Into a Business Component	12-18

Explicit Join Definition 12-19  
Joining Party Data into a Party Business Component 12-20  
Explicit Join Definition 12-21  
Mapping a Field to a Column in a Party Table 12-22  
Creating a Join to a Party Table 12-23  
Create the Single-Value Field 12-24  
Key Considerations for Party Joins 12-25  
Lesson Highlights 12-26  
Practice 12-27

### **13 Business Components and Fields**

Objectives 13-2  
Business Component Properties 13-3  
Business Component Editing Properties 13-4  
Applet Editing Properties 13-5  
Owner Delete Property 13-6  
Search Specification Property 13-7  
Search Specification Considerations 13-8  
Sort Specification Property 13-9  
Expression Builder 13-10  
Business Component Field Properties 13-11  
Required and Read Only Properties 13-12  
Force Case Property 13-13  
Validation Property 13-14  
Validation Message 13-15  
Displaying A Validation Message 13-16  
Predefault Value Property 13-17  
Post Default Value Property 13-18  
Calculated Field 13-19  
Calculated Value Property 13-20  
Restrictions on Calculated Fields 13-21  
Lesson Highlights 13-22  
Practice 13-23

### **14 Business Objects and Links**

Objectives 14-2  
Business Objects (BOs) 14-3  
Business Object Definition 14-5  
Business Object Component 14-6  
Link Definition 14-7  
1:M Link Definition 14-8

Cascade Delete Property 14-9  
M:M Link Definition 14-11  
Child Deletion for M:M Links 14-12  
Grandchild Business Components 14-13  
Links for Grandchild Data 14-14  
Summary of Object Types 14-15  
Lesson Highlights 14-16  
Practice 14-17

## **15 Creating a New Business Component Using a Standard 1:M Extension Table**

Objectives 15-2  
Business Challenge 15-3  
Solution: Create New Business Components 15-4  
Review: 1:M Extension Table 15-5  
Create a New Business Component 15-7  
New 1:M Business Component 15-8  
Multiple Business Components 15-9  
Set Values for Type 15-10  
Steps to Use the New BC 15-11  
1. Create a Link 15-12  
2. Add BC to a Business Object 15-13  
3. Create a List Applet 15-14  
4. Assign the Applet to a View 15-15  
Lesson Highlights 15-16  
Practices 15-17

## **16 Extending the Siebel Database**

Objectives 16-2  
Incorporating Additional Data 16-3  
Adding New Fields 16-4  
Extending the Siebel Database 16-5  
Creating a Custom Extension Column 16-6  
Creating a Stand-Alone Table 16-7  
Table Wizard 16-8  
Creating a 1:1 Extension Table 16-9  
Creating a 1:M Extension Table 16-11  
Creating an Intersection Table 16-13  
Creating Foreign Keys 16-15  
Propagating Database Changes to Other Developers 16-16  
1. Apply Changes to the Local Database 16-17  
2. Propagate Changes to Server Database 16-18

3. Propagate Changes to Other Developers 16-19  
Lesson Highlights 16-20  
Practices 16-21

## **17 Additional Data Layer Configuration**

Objectives 17-2  
Additional Considerations 17-3  
Custom Indexes 17-4  
Creating a Custom Index 17-5  
Enterprise Integration Manager (EIM) 17-6  
EIM Mappings 17-7  
Dock Objects 17-8  
Types of Dock Objects 17-9  
Dock Object Visibility Rules 17-10  
Modifying Dock Objects 17-11  
Extending a Table to Support Case Insensitive Queries 17-12  
Creating CIAI 17-13  
CIAI Wizard 17-14  
Lesson Highlights 17-15  
Practices 17-16

## **18 Configuring Drilldowns and Applet Toggles**

Objectives 18-2  
Navigation Using Drilldown 18-3  
Static Drilldown: Same Business Component 18-4  
Configuring Drilldown Within the Same Business Component 18-5  
Static Drilldown: Different Business Component 18-6  
Configuring Drilldown to a Different Business Component 18-7  
Dynamic Drilldown 18-8  
Determining the Target View 18-9  
Configuring Dynamic Drilldown 18-10  
Specifying the Conditions 18-11  
Thread Bar 18-12  
Configuring the Thread Bar 18-13  
Applet Toggles 18-14  
Configuring Applet Toggles 18-15  
Togglebar Tag 18-16  
Dynamic Applet Toggling 18-17  
Configuring Dynamic Applet Toggling 18-19  
Lesson Highlights 18-20  
Practice 18-21

## **19 Configuring Picklists**

- Objectives 19-2
- Picklists 19-3
- Static Picklist 19-4
- Static PickList Values 19-5
- Administering Static Picklists 19-6
- Administering Static Picklists Using Siebel Tools 19-7
- Dynamic Picklist 19-8
- Picklist Terms 19-9
- PickList Generic Business Component 19-10
- Object Definitions for PickLists 19-11
- PickList Object Definition 19-12
- Single Value Field and SVF Pick Map 19-13
- SVF Pick Maps 19-14
- Pick Applet 19-15
- Control and List Column 19-16
- Creating a Picklist 19-17
- Pick List Wizard Inputs for Static Picklists 19-18
- Defining the Static Picklist 19-19
- Pick List Wizard 19-20
- Pick List Wizard Inputs for Dynamic Picklists 19-21
- Defining the Dynamic Picklist 19-22
- Defining the Pick Maps 19-23
- Pick List Wizard 19-24
- Constrained Picklist 19-25
- Constraining a Picklist 19-26
- Hierarchical Picklists 19-27
- LOVs for Hierarchical Picklists 19-28
- Configuring a Hierarchical Picklist 19-29
- Configuring the SVF Pick Maps 19-30
- Summary of Object Types 19-31
- Lesson Highlights 19-32
- Practice 19-33

## **20 Configuring Multi-Value Groups**

- Objectives 20-2
- Multi-Value Group (MVG) 20-3
- Shuttle Applet 20-4
- Multi-Value Group Display 20-5
- MVG Advantages 20-6

MVG Concepts 20-7  
Multi Value Field (MVF) 20-8  
Multi Value Link 20-9  
Multi Value Fields and Multi Value Links 20-10  
Multi-Value Group Applet 20-11  
Association Applet 20-12  
Invoking the MVG Applet 20-13  
Primaries 20-14  
Primaries and Performance 20-15  
Primary Foreign Key 20-17  
Finding the Primary Foreign Key 20-18  
Enabling a Primary for a MVG 20-19  
The Auto Primary Property 20-20  
Setting the Primary Record 20-21  
Creating a Multi-Value Group 20-22  
MVG Wizard Inputs 20-23  
MVG Wizard 20-24  
Summary of Object Types 20-25  
Lesson Highlights 20-26  
Practice 20-27

## **21 Configuring Access Control**

Objectives 21-2  
Access Control: Review 21-3  
Business Components and Record-Level Access Control 21-4  
Visibility Views 21-5  
View Modes 21-6  
Configuring Visibility Views 21-7  
BusComp View Mode Definition 21-8  
Personal View 21-9  
My View 21-10  
Retrieving My View Records 21-11  
My Team's (Manager) View 21-12  
Retrieving My Team's Records 21-13  
All View 21-14  
Retrieving Records for an All View 21-15  
Across All Organizations View 21-16  
Administration View 21-17  
Group View 21-18  
Private Flag 21-19  
View Web Template Item Applet Visibility 21-20

Visibility For Picklists 21-21  
Picklist Visibility 21-22  
Visibility for an Individual Picklist 21-23  
Lesson Highlights 21-24  
Practice 21-25

## **22 Configuring User Properties**

Objectives 22-2  
User Properties 22-3  
Object Definitions with User Properties 22-4  
User Properties 22-5  
Editing User Properties 22-6  
Expression Editor 22-7  
Multiple Instances of a User Property 22-8  
Examples of Applet User Properties 22-9  
DefaultFocus\_New 22-10  
NoDataHide 22-11  
EnableDragAndDropInList 22-12  
Examples of Business Component User Properties 22-14  
All Mode Sort 22-15  
BC Read Only Field 22-16  
On Field Update Set 22-17  
Parent Read Only Field 22-18  
Field Read Only Field 22-19  
Disable Automatic Trailing Wildcard Field List 22-20  
Required (Field User Property) 22-21  
Lesson Highlights 22-22  
Practice 22-23

## **23 Migrating Repository Changes**

Objectives 23-2  
Multiple Enterprises 23-3  
Migrating Between Enterprises 23-4  
Items to Be Migrated 23-5  
Repository Object Definitions 23-6  
Name of the Repository 23-7  
References to the Name of the Repository 23-8  
Files 23-9  
Customized Data 23-10  
Overview of the Migration Process 23-11  
Benefits of the Process 23-12

- Prepare the Development Enterprise 23-13
- Prepare the Target Enterprise 23-14
- Migrate the Repository to the Target Enterprise 23-15
- If Necessary, Rename the Repositories 23-16
- Migrate Files and Customized User Data 23-17
- Repository Customizations 23-18
- Siebel Enterprise Parameters 23-19
- Lesson Highlights 23-20
- Practice: 23-21

## **24 Troubleshooting**

- Objectives 24-2
- Common Mistakes 24-3
- Tools Mistakes 24-4
- Compilation Mistakes 24-5
- Administration Mistakes 24-6
- Testing Mistakes 24-7
- Common Configuration Problems 24-8
- User Interface Layer 24-9
- Business Layer 24-11
- Data Layer 24-13
- Diagnosing Problems 24-14
- Create a File to Capture SQL 24-15
- Turn on SQL Spooling 24-16
- Have a Fallback 24-18
- Do Not Configure on the Server 24-19
- Lesson Highlights 24-20
- Practice 24-21
