OFSAA 8.x Implementation Basel Ed 2

Duration: 3 Days

Overview

Enroll for the three Days OFSAA 8.x Implementation Basel Ed 2 training certification training from Koenig Solutions accredited by Oracle. This OFSAA 8.x Implementation Basel training is designed to help you understand the importance of Basel Regulatory Capital at banks. Expert Oracle University instructors will teach you how to explain functionalities of OFSAA Basel Regulatory Capital Application and describe its architecture to clients.

Throughout this course, you'll be encouraged to discuss and quiz your classmates on new skills you're learning, as well as your instructor. You'll get a chance to complete hands-on exercises to reinforce new concepts and help you apply it to your daily job.

Benefits to You

By taking this course, you'll develop the skills to turn client requirements and data into useful project information by learning through a four-pronged delivery strategy. This insight can then be used to take action to design and implement a Basel Application at a bank or financial institution.

Target audience

- Analyst
- End User
- Implementer
- Manager

Objectives

- Explain process flow of Basel Application
- Explain components of Basel Application
- Analyze Basel Application architecture
- Apply components of OFSAAI used by BASEL APPLICATION
- Understand functionalities delivered by OFSAA BASEL APPLICATION
- Describe usage of Run Management
- Describe the Optimizer Utility for Credit Risk Mitigation
- Explain Attribution Analysis
- Explain how to use rules to construct stress scenario
- Describe BASEL APPLICATION data model
- Explain standard data requirement for BASEL APPLICATION
- Understand the Basel Regulatory Guidelines
- Analyze data flow between stage, processing and result subject areas

- Create Business metadata
- Create Technical metadata
- Explain pre-configured Basel reports in Basel Analytics Application

Learn To:

- Use various tools and techniques within OFSAA to meet regulatory requirements.
- Explore Basel guidelines.
- Walk through an end-to-end process flow of Basel Application.
- Analyze Basel Application architecture.
- Describe the Optimizer Utility for Credit Risk Mitigation.
- Analyze data flow between stage, processing and result subject areas.
- Explain attribution analysis.
- Apply components of OFSAAI used by BASEL APPLICATION.
- Create technical and business metadata.

Topics

- Overview of Basel Regulatory Guidelines
  - Basel II
  - Basel III
- Overview of OFSAA Basel Application
  - User Interface
  - Process Flow
  - Data Management
  - Data Flow
- Basel Pre-Configured Run Details
  - Walk through of Capital Buffer Process in pre-defined Basel Run
- Review of OFSAA Application Documents
  - Data Download Specification
  - Run Chart
  - Business Metadata
  - Rule Metadata
- Basel Use Case
  - Configuration and execution of a run to compute RWA
- Basel Analytics
  - Overview of Pre-defined Basel Regulatory Reports
