Find below the content for 5 days for Message Broker:- IBM WebSphere MQ Series
Administration

Course introduction
IBM Integration Bus overview
Product installation, configuration, and security planning
Exercise: Integration node setup and customization
Connecting to IBM MQ
Exercise: Connecting to IBM MQ
Administration in the IBM Integration Toolkit
Exercise: Using the IBM Integration Toolkit
Administration basics
Exercise: Administering the IBM Integration Bus runtime components
Implementing IBM Integration Bus administration security
Exercise: Using file-based security to control administration access
Exercise: Using queue-based security to control administration access
Implementing IBM Integration Bus message flow security
Administering web services and web service security
Exercise: Implementing web services and web services security
Diagnosing problems
Exercise: Using problem diagnosis tools
Exercise: Identifying runtime problems
Monitoring the integration node and message flow performance
Publish/subscribe implementation overview
Exercise: Viewing runtime statistics
Configuring IBM Integration Bus for high availability
Exercise: Administering workload management policies
Monitoring, recording, and replaying message flow events
Exercise: Recording and replaying message flow data
Extending IBM Integration Bus
Course summary
