

R12.x Oracle Cost Management Fundamentals

Duration: 3 Days

What you will learn

This course will be applicable for customers who have implemented Oracle E-Business Suite Release 12 or Oracle E-Business Suite 12.1.

In this course, students learn how to set up and use Oracle Cost Management in conjunction with Oracle Inventory, Oracle Bills Of Material, and Oracle Work In Process (WIP). Students also learn how to use Oracle Cost Management as a tool for inventory control, valuation, profit analysis, and reporting. Topics also include Subledger Accounting (SLA).

Learn To:

Simulate, analyze, and forecast product costs

Easily update and manage item unit costs

Define the inventory structure and cost controls that are important to your business

View item costs, inventory and work in process values, accounting entries, and gross margins

Automatically transfer inventory and work in process transactions to your general ledger

Value inventory and work in process on a perpetual basis

Related Training

Required Prerequisites

R12 Oracle Inventory Management Fundamentals

R12 Oracle Purchasing Fundamentals

R12 Oracle Bills of Material and Engineering Fundamentals

Basic accounting concepts

Suggested Prerequisites

R12 Oracle Advanced Supply Chain Planning Fundamentals

Course Objectives

Describe costing methods

Analyze transactions for WIP and Inventory costing at (standard and average)

Establish cost controls

Maintain standard costs on a periodic basis

Course Topics

Overview of Oracle Cost Management

Using Oracle Cost Management
Role of Cost Management
Understanding Costing Methods
Performing Inventory Control and Valuation
Analyzing Profits
Management Reporting
Budgeting and Planning
Oracle Cost Management Integration

Overview of Setup and Implementation of Oracle Cost Management

Setting Up in Other Applications
Setting Up in Oracle General Ledger
Setting Up in Oracle Work in Process
Setting Up in Oracle Inventory
Setting Up in Oracle Purchasing
Setting Up in Oracle Bills of Material
Setting Up in Oracle Cost Management

Setting Up in Oracle Cost Management

Setting Up Profile Options
Setting Up Cost Types
Copying Costs
Setting Up Activities and Activity Costs
Defining Project Cost Groups
Understanding Cost Elements
Setting Up Subelements
Understanding Landed Cost Management

Describing Cost Controls

Describing General Ledger Cost Controls
Inter-organization Transfers with Multiple Set of Books
Describing Organizational Cost Controls
Organization-Level Default and System Accounts
Defining Inter-organization Transfer Information
Describing Financial Cost Controls
Describing WIP Controls for Costing and WIP Parameters
Receiving Options and Controls

Item Costing

Selecting an Item-Cost Type Association
Defining Item Costs
Viewing Item Costs
Describing Elemental Costs

- Phantom Costing
- Mass Editing Item Accounts and Cost Information
- Viewing Material and WIP Transaction Distributions
- Resubmitting Transactions for Costing

Defining Resource and Overhead Costs

- Defining BOM Parameters
- Defining Resource Costs and Overheads
- Defining Departments and Associating Resources
- Associating Overheads With Departments and Resources
- Defining Routings
- Defining Bills of Material

Standard Costing

- Overview of Standard Costing
- Understanding the WIP Transactions Cost Flow
- Setting Up Standard Costing
- Setting Up Standard Costing for Manufacturing
- Reporting Pending Adjustments
- Running a Supply Chain Cost Rollup
- Updating Standard Costs
- Understanding Standard Cost Transactions

Average Costing

- Overview of Average Costing
- Setting Up Average Costing
- Understanding Average Costing Flows
- Updating Average Costs
- Viewing Item Cost History Information
- Understanding Average Cost Variances
- Average Cost Transactions

Analyzing WIP Transactions

- Overview of Analyzing WIP Transactions
- Viewing Job and Schedule Values Online
- Reporting and Analyzing WIP Values

Period Close for Inventory Organizations

- Cost Accounting at Period Close Overview
- Viewing Pending Transactions
- Transfer Options
- Closing the Period in Inventory
- Posting to the General Ledger
- Reconciling Perpetual Inventory to GL
- Client Extensions

Periodic Costing

- Major Features of Periodic Costing
- Understanding Periodic Average Costing
- Business Value of Periodic Average Costing
- Understanding Periodic Incremental LIFO Costing
- Business Value of Periodic Incremental LIFO Costing

Setting Up Periodic Costing
Associating Organization with an Organization Cost Group
Processing and Updating Periodic Costs

FIFO and LIFO Costing

Major Features of FIFO / LIFO Costing
Understanding Layer Cost Flows
Updating Layer Costs
Viewing Layer Item Costs
Understanding Layer Cost Variances
Layer Cost Transactions
Layer Cost Transactions in Manufacturing

Revenue and COGS Matching

Overview of Revenue / COGS Matching
Setting Up Revenue / COGS Matching
Revenue / COGS Recognition Methodology
COGS Recognition and Concurrent Processes
Supported Business Scenarios

Subledger Accounting

Overview of Subledger Accounting (SLA)
Standard Accounting Process
SLA Accounting Process
Subledger Accounting Profile Option
Defining Accounting Derivation Rules
Create Accounting Program-
Viewing Accounting and Accounting Events

Describing T-Accounts for Inventory Transactions for Standard Costing

Describing T-Accounts

Describing T-Accounts for WIP Transactions for Standard Costing

Describing T Accounts for WIP Transactions
