

# Oracle CPQ Cloud: Implementing Subscription Ordering

## Course Introduction

- Training Site Information
- Course Audience
- Course Prerequisites
- Course Objectives
- Course Agenda

## Subscription Ordering Overview

- Subscription Ordering
- Subscription Ordering Concepts
- Subscription Ordering Commerce Attributes
- Subscription Ordering Limitations

## Subscription Ordering Implementation Process

- Subscription Ordering Implementation Process
- Subscription Ordering Implementation Prerequisites
- Install ABO Implementation Package
- Perform User Interface (UI) Modifications
- Perform Subscription Ordering Customizations
- Verify the Implementation

## Subscription Ordering BOM Mapping

- Bill of Materials (BOM)
- BOM Mapping
- BOM Mapping Tables
- BOM Mapping Use Cases
- BOM Mapping Rules
- BOM Mapping Instance

## Implementing BOM Mapping

- BOM Mapping Implementation Process
- Capture BOM Definition
- BOM Tables
- BOM Rules
- Referencing BOM items

## Subscription Ordering - BML Components

- ABO BML Function Dependency
- ABO BML Function Flow- Create an Asset
- ABO BML Function Flow- Modify

- ABO BML Function Flow- Follow-on Order
- ABO BML Function Flow- Reconfigure
- ABO BML Function Flow- Terminate
- Helper Functions/Parameters

## Installing the ABO Package

- CPQ Cloud Packages
- Typical Package Contents
- ABO Package Contents
- Installing the ABO Package

## Subscription Ordering Functional Overview

- Configuration Session
- Modify, Follow-on Orders, and Reconfigure
- Terminate, Suspend, and Resume
- Attribute Summary
- BOM Structure
- Projected Asset Cache (PAC)
- Configuration Save Point
- Date-Time Formats

## Subscription Ordering User Interface and Customization

- Commerce Layout
- Local Asset Repository
- Remote Asset Repository
- Populating Additional Product Details
- Adding a Suspend and Resume Process
- Enabling Subscription Ordering for Multiple Commerce Processes
- Attribute Naming Conventions

## Verifying the Subscription Ordering Implementation

- Verification Process for Subscription Ordering
- Subscription Ordering - When Its Working Correctly
- Ensure Data Flow with External Application
- CPQ Cloud Log Files
- BML Print Statements/Log
- JSON Overview
- ABO Diagnosis Framework
- Using the ABO Diagnosis Framework Log

## Using Subscription Ordering

- Asset Creation
- Asset Modification
- Follow-on Orders
- Reconfigure an Asset
- Terminate an Asset
