

VMware vRealize Operations: Install, Configure, Manage

Course Overview

This five-day course, designed for experienced VMware vSphere® users, teaches you how to use VMware vRealize® Operations™ as a forensic and predictive tool. Based on VMware ESXi™ 6.7, VMware vCenter Server® 6.7, and vRealize Operations 7.0, this course includes instruction on advanced capabilities, including customization and management.

Course Objectives

By the end of the course, you should be able to meet the following objectives:

- Identify features and benefits of vRealize Operations
- Deploy vRealize Operations
- Use interface features to assess and troubleshoot operational issues
- Recognize how to use vRealize Operations components to build scalability and availability
- Recognize effective ways to optimize performance and capacity in data centers
- Troubleshoot and manage issues and configurations using alerts and dashboards
- Use Endpoint Operations Management to monitor operating systems and applications
- Create policies to meet the operational needs of your environment
- Create custom alert definitions, reports, and views
- Configure widgets for dashboards
- Configure super metrics
- Set up users and user groups for controlled access to your environment
- Extend the capabilities of vRealize Operations by adding management packs and solutions

Target Audience

Experienced system administrators and system integrators, and consultants responsible for customizing vRealize Operations content

Prerequisites

This class requires completion of one of the following courses:

- [VMware vSphere: Install, Configure, Manage \[V6.x\]](#)
- [VMware vSphere: Optimize and Scale \[V6.x\]](#)

Or system administration experience with vSphere deployments

Specialization

This course prepares you for the following specialization:

- [VMware vRealize Operations 2017 Specialist](#)

Course Delivery Options

- Classroom
- Live Online
- [Onsite](#)

Product Alignment

- vRealize Operations 7.0
- ESXi 6.7
- vCenter Server 6.7

Course Modules

- 1 Course Introduction
 - Introductions and course logistics
 - Course objectives
- 2 Introduction to vRealize Operations
 - Describe how to use vRealize Operations to manage the software-defined data center
 - Identify features and benefits of vRealize Operations
- 3 Deploying vRealize Operations
 - Design and size a vRealize Operations cluster
 - Install a vRealize Operations cluster
 - Configure a vRealize Operations cluster for high availability
 - Describe different vRealize Operations deployment scenarios
 - Describe how to use VMware vRealize® Suite Lifecycle Manager™ to deploy vRealize Operations
- 4 vRealize Operations Concepts
 - Identify the tasks that can be performed in the administration and product user interfaces
 - Recognize how to use dashboards, views, and reports to gather information about the environment
 - Use tags, applications, and custom groups to group related objects in the environment
- 5 vRealize Operations Architecture
 - Describe the functions of the components in a node
 - Identify the types of nodes and their roles in a vRealize Operations cluster
 - Recognize how a node's components interact to achieve scalability and availability
 - Identify ways that data is collected and analyzed by vRealize Operations
- 6 Performance Optimization
 - Assess the performance of your environment to determine which data centers need optimization
 - Define the business and operational intents for your data centers
- 7 Capacity Optimization
 - Automate the process of optimizing and balancing workloads in your data centers
 - Report on the results of your optimization efforts
- 8 Troubleshooting and Managing Configurations
 - Troubleshoot issues by monitoring alerts
 - Use step-by-step workflows to troubleshoot different vSphere objects
 - Assess your environment's compliance to standards
 - View the configurations of vSphere objects in your environment
 - Describe how logs can be accessed by integrating vRealize Operations with VMware vRealize® Log Insight™
 - View inventory trees on the Environment page to monitor vSphere objects
 - Monitor the performance of a vRealize Operations instance
- 9 Operating System and Application Monitoring
 - Deploy the Endpoint Operations Management agent
 - Monitor operating systems by viewing the metrics collected by the Endpoint Operations Management agent
- 10 vRealize Operations Policies
 - Create policies for various types of workloads
 - Explain how policy inheritance works
- 11 Custom Alert Definitions
 - Create symptom definitions
 - Create recommendations, actions, and notifications

VMware, Inc. 3401 Hillview Avenue Palo Alto CA 94304 USA Tel 877-486-9273 Fax 650-427-5001 www.vmware.com

THE EXPRESS WARRANTY SET FORTH IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE SERVICES AND DELIVERABLES PROVIDED BY VMWARE, OR AS TO THE RESULTS WHICH MAY BE OBTAINED THEREFROM. VMWARE WILL NOT BE LIABLE FOR ANY THIRD-PARTY SERVICES OR PRODUCTS IDENTIFIED OR REFERRED TO CUSTOMER. All materials provided in this workshop are copyrighted by VMware ("Workshop Materials"). VMware grants the customer of this workshop a license to use and make reasonable copies of any Workshop Materials strictly for the purpose of facilitating such company's internal understanding, utilization and operation of its licensed VMware product(s). Except as set forth expressly in the sentence above, there is no transfer of any intellectual property rights or any other license granted under the terms of this workshop. If you are located in the United States, the VMware contracting entity for the service will be VMware, Inc., and if outside of the United States, the VMware contracting entity will be VMware International Limited.

- Create alert definitions that monitor resource demand in hosts and VMs
- 12 Views and Reports
- Build and use custom views in your environment
 - Create custom reports for presenting data about your environment
- 13 Custom Dashboards
- Create dashboards that use predefined and custom widgets
 - Configure widgets to interact with other widgets and other dashboards
 - Configure the Scoreboard widget to use a metric configuration file
 - Manage dashboards by grouping dashboards and sharing dashboards with users
- 14 Super Metrics
- Create super metrics and associate them with vSphere objects
 - Enable super metrics in policies
- 15 User Access Control
- Recognize how users are authorized to access objects
 - Determine privilege priorities when a user has multiple privileges
 - Create local users and user groups
 - Import users and user groups from an LDAP source
- 16 Extending and Managing a vRealize Operations Deployment
- Identify the management packs that are available to your environment
 - Install and configure a management pack
 - Monitor the health of a vRealize Operations cluster
 - Generate a support bundle
 - View vRealize Operations logs and audit reports
 - Perform vRealize Operations cluster management tasks
