

Oracle Database 19c: ASM Administration Workshop

Course Contents

Lesson 01: ASM Overview

- ASM Overview
- ASM Components: ASM Disk Group

Lesson 02: Administering ASM Instances

- Administering ASM Instances
- Starting and Stopping the Node Listener

Lesson 03: Flex ASM

Lesson 04: Administering ASM Disk Groups Part I

- Administering ASM Disk Groups Part I
- Features Enabled by Disk Group Compatibility Attributes
- REBALANCE POWER

Lesson 05: Administering ASM Disk Groups Part II

- Administering ASM Disk Groups Part II
- Checking the Consistency of Disk Group Metadata

Lesson 06: Flex ASM Disk Groups

Lesson 07: Administering ASM Files, Directories, and Templates

- Administering ASM Files, Directories, and Templates
- ASM Directories

Lesson 08: Administering Oracle ACFS

- Administering Oracle ACFS
- Linux-UNIX Extensions

Lesson 09: ACFS/ADVM Enhancements

- ACFS/ADVM Enhancements
- 4K Sector and Metadata Support Considerations

Lesson 10: Oracle ASM Advanced Topics

- Oracle ASM Advanced Topics
- Encrypting ACFS File Systems

Lesson 11: Point-In-Time Database Clones

Lesson 12: Cleanup and Catchup Scripts
