Discovery Fundamentals

1: Overview

- Lab 1.1: Discovery and CMDB Tour

2: MID Server

- Lab 2.1: MID Server Installation Validation

3: Running Discovery

- Lab 3.1: Running Discovery

4: Credentials and Behaviors

- Lab 4.1: Windows Discovery
- Lab 4.2: Linux Discovery
- Lab 4.3: Behaviors
- Lab 4.4: Router Discovery

5: Phases, Probes, and Classifications

- Lab 5.1: Ports Probes and IP Services
- Lab 5.2: Classifications and Trigger Probes
- Lab 5.3: CI Identification Troubleshooting

6: Application Mapping

- Lab 6.1: Process Classification
- Lab 6.2: Process Classification and Identification
- Lab 6.3: Application to Application Mapping

7: Asset, CI, and File-based Discovery

- Lab 7.1: Asset and CI Relationships

8: Horizontal Discovery Patterns

- Lab 8.1: Extend Windows OS – Servers Pattern

Lab 8.2: Extend Linux Server Pattern

Lab 8.3: New SNMP Classifier and Discovery Pattern

Lab 8.4: Remaining Firewall Requirements

9: Application Discovery Patterns

Lab 9.1: Application Discovery Pattern

Lab 9.2: More Mongoose Requirements

Lab 9.3: Troubleshooting the Pattern

10: Configuration Management

Lab 10.1: CMDB Health Properties

Lab 10.2: CMDB Health Dashboard

Lab 10.3: Hardware Configuration Management

Lab 10.4: Application Configuration Management
