

Introduction to Google Web Toolkit Training

Course content:

I. The GWT Concept

- Dynamic HTML
- The GWT Solution
- So What is GWT?
- The GWT Compiler
- GWT Design Axioms
- Getting Started with GWT
- Creating a GWT Project
- A GWT Project Structure
- Executing a GWT Project
- Using GWT with Legacy Web Apps
- GWT Module Configuration
- GWT Module Entry Point
- Development Mode versus Web Mode
- Our Class Project: A Film Rental
- Application

II. GWT User Interfaces

- GWT User Interfaces
- Creating and Configuring Widgets
- Widget Hierarchy
- Widget Behavior
- Using the RootPanel
- Basic Styling
- Some Basic Widgets

III. Organizing User Interfaces in GWT

- Laying Out Widgets into Panels
- Various GWT Layouts
- FlowPanel
- HorizontalPanel and Vertical Panel
- The RootPanel
- DockPanel, DockLayoutPanel,
- SplitLayoutPanel, and LayoutPanel
- Using Grid
- Using FlexTable
- Using ScrollPanel
- Popups and Dialogs
- Other Utility Panels

IV. Event Handling in GWT

- Event Handling in User Interfaces
- The GWT Event Model
- Using Event Handlers
- Types of Events
- FormPanel Events

V. Images and Resources

- Using Images in GWT
- The GWT Image Widget
- Prefetching Images
- Using ImageBundle and ClientBundle
- Creating a Client Bundle for Images and Text
- Using a Client Bundle
- More on Client Bundles

VI. GWT Utility Classes

- A. GWT and Cookies
- B. The GWT Random Class
- C. Animation in GWT
- D. Uploading Files in GWT
- E. The GWT Class
- F. The GWT Window Class
- G. The Window.Location Class
- H. The GWT Timer Class

VII. History and Bookmarks in GWT

- History and Bookmarks in GWT
- Using Hyperlink Widgets
- Managing History
- The History Token
- Adding New History Items
- The History Handler
- Handling Bookmarks

VIII. RPC Protocol in GWT

- Why a New Protocol?
- RPC Protocol in GWT
- GWT RPC Basics
- Steps to RPC: Code Components
- RPC Components
- Setting the Servlet Path in a Module
- Creating an Invocation Target
- RPC Events
- No Synchronous RPC in GWT

- Data Serialization

IX. GWT UiBinder and SafeHtml

- What Is UiBinder?
- UiBinder Benefits
- UiBinder Templates
- Creating a UiBinder in Eclipse
- What Is SafeHtml?

X. More on GWT User Interfaces

- Using Menus via a MenuBar
- Using a Tree Widget
- Using SuggestBox
