

## R12.2.9 Oracle Bills of Material and Engineering Fundamentals

### Table of Contents

- Defining Items
  - Creating Manufacturing and Engineering Items
  - Using Item Templates
  - Entering and Revising Item Attributes
  - Enabling Organization Assignments
  - Searching Items
  - Viewing Item Information
  - Creating Item Catalog Groups
  - Defining Descriptive Elements
- Setting Up Bills of Material and Routings
  - Setting Up Workday Calendars
  - Using the Workday Calendar
  - Setting Up BOM and Routing Information
  - Defining Competencies for Resources
  - Defining Competencies for Routings
  - Defining Competencies for Standard Operations
  - Creating Alternates
  - Defining Lookups
- Creating Bills of Material
  - Overview of Bills of Material
  - Creating Standard Bills of Material
  - Entering Bills of Material
  - Assigning Descriptive Elements
  - Creating Reference Designators
  - Assigning Substitute Components

- Creating Alternate Bills of Material
- Creating Customized Bills of Material
  - Creating Planning, Model and Option Class Bills of Material
  - Using Configure to Order Features
  - Autocreating Configuration Items
  - Deactivating Configuration Items
  - Creating Product Families
  - Assigning Members
- Maintaining Bills of Material
  - Revising Bills of Material and Items
  - Using Tools Menu
  - Reviewing Indented Bills of Material
  - Comparing Bills of Material
  - Using Common Bills of Material
  - Performing Mass Changes
  - Bills of Material E-Records
  - Bills of Material Business Events
- Create Routings
  - Creating Routings
  - Defining Operating Competencies for Performing Routing Operations
  - Calculating Lead Times
  - Computing Manufacturing Lead Time
  - Calculating Cumulative Total Lead Time
- Maintaining Routings
  - Revising Routings
  - Creating Standard Operations
  - Defining Operation Competencies for Standard Operations
  - Viewing Resource Usage
- Common Bills of Material and Routing Functionality

- Copying Bills and Routings
- Referencing Common Bills and Routings
- Defining Documents
- Defining Bill and Operation Documents
- Deleting Information
- Importing Bills and Routings
- Engineering Overview
  - Introducing Oracle Engineering
- Setting Up Oracle Engineering
  - Setting Up Engineering Flowchart
- Creating Engineering Change Orders
  - Engineering Change Orders Overview
  - Creating ECOs
  - ECO Life Cycle
- Maintaining Engineering Change Orders
  - Implementing ECOs
  - Viewing ECO Information
  - Running ECO Reports
  - Managing ECOs
  - Understanding Engineering Change Order Business Object Interface
- Transferring and Copying Engineering Items, Bills, and Routings
  - Transferring and Copying Product Information
  - Transferring Information to Manufacturing
  - Copying Information to Manufacturing
