

Microsoft Secure Database Administration with Development

Introduction TO SQL Database and Architecture

Working with databases

- Lesson 1: Introduction to Data Storage with SQL Server
- Lesson 2: Managing Storage for System Databases
- Lesson 3: Managing Storage for User Databases

SQL Server Security

- Lesson 1: Authenticating Connections to SQL Server 1-2
- Lesson 2: Authorizing Logins to Connect to Databases 1-12
- Lesson 3: Authorization Across Servers

Assigning Server and Database Roles

- Lesson 1: Working with Server Roles
- Lesson 2: Working with Fixed Database Roles
- Lesson 3: User-Defined Database Roles

Authorizing Users to Access Resources

- Lesson 1: Authorizing User Access to Objects
- Lesson 2: Authorizing Users to Execute Code
- Lesson 3: Configuring Permissions at the Schema Level

Protecting Data with Encryption and Auditing

- Lesson 1: Options for Auditing Data Access in SQL Server
- Lesson 2: Implementing SQL Server Audit
- Lesson 3: Managing SQL Server Audit
- Lesson 4: Protecting Data with Encryption

Ensuring Data Integrity Through Constraints

- Lesson 1: Enforcing Data Integrity
- Lesson 2: Implementing Data Domain Integrity
- Lesson 3: Implementing Entity and Referential Integrity

Introduction to Indexes

- Lesson 1: Core Indexing Concepts
- Lesson 2: Data Types and Indexes
- Lesson 3: Heaps, Clustered, and Non clustered Indexes

Designing and Implementing Stored Procedures

- Lesson 1: Introduction to Stored Procedures
- Lesson 2: Working with Stored Procedures
- Lesson 3: Implementing Parameterized Stored Procedures

Designing and Implementing User-Defined Functions

- Lesson 1: Overview of Functions
- Lesson 2: Designing and Implementing Scalar Functions
- Lesson 3: Designing and Implementing Table-Valued Functions
- Lesson 4: Considerations for Implementing Functions

Backing Up SQL Server Databases

- Lesson 1: Backing Up Databases and Transaction Logs 6-2
- Lesson 2: Managing Database Backups 6-11
- Lesson 3: Advanced Database Options

Restoring SQL Server Databases

- Lesson 1: Understanding the Restore Process
- Lesson 2: Restoring Databases
- Lesson 3: Advanced Restore Scenarios
- Lesson 4: Point-in-time Recovery

Monitoring SQL Server with Alerts and Notifications

- Lesson 1: Monitoring SQL Server Errors
- Lesson 2: Configuring Database Mail
- Lesson 3: Operators, Alerts, and Notifications

Tracing Access to SQL Server with Extended Events

- Lesson 1: Extended Events Core Concepts
- Lesson 2: Working with Extended Events

Troubleshooting SQL Server

- Lesson 1: A Troubleshooting Methodology for SQL Server
- Lesson 2: Resolving Service-Related Issues
- Lesson 3: Resolving Connectivity and Login Issues
