

Qualcomm Snapdragon Digital Chassis

Course Content –

- Snapdragon Auto Connectivity – Solutions for ubiquitous connectivity (5G, C-V2X, Wi-Fi/Bluetooth®, MF-GNSS, DSDA) in and around the vehicle to support enhanced safety and infotainment
- Snapdragon Cockpit Platform – For rich driving experiences including configurable 3D digital cluster, E-mirrors, 3D navigation, natural language processing, streaming multimedia, premium audio and intelligent UI
- Snapdragon Car-to-Cloud – Device management with over-the-air (OTA) feature upgrades, global connectivity and integrated analytics to personalize the user experience and encourage drivers to adopt new features and services
- Snapdragon Ride Platform – Advanced driver-assistance systems (ADAS) and automated driving (AD) platforms built around low-power, high-performance SoC platforms, flexible vision solutions and an SDK for simulation and continuous learning
