BE402: Progressive Development with TIBCO BusinessEvents® 5.1.x

COURSE OVERVIEW

This course examines advanced development techniques for building Complex Event Processing (CEP) solutions with TIBCO BusinessEvents®. Participants are introduced to the BusinessEvents API, which is used to embed rules in third-party applications. Attendees build a JUnit based test program to test the BusinessEvents engine as a black box application, once again employing the BusinessEvents API. Students explore load balancing options to optimize BusinessEvents engines.

Fundamentals of TIBCO ActiveSpaces® are also discussed and students implement an ActiveSpaces channel to work with data in an external data grid. Finally, attendees design rule templates for a form-based user interface, and build business rules using these forms in the browser-based WebStudio interface. The Rules Management Server is examined as a component of the business rules approval and deployment process.

The course concludes with development of BPMN-based processes, which are used to control rule execution and execute selected parts of your CEP solution.

LEARNING OBJECTIVES

- Identify features and functions of the BusinessEvents® API
- Test BusinessEvents solutions using black-box testing methodology
- Explain TIBCO ActiveSpaces® concepts and terminology
- Use BusinessEvents® to interact with an ActiveSpaces® based shared cache
- List steps and components required to build and deploy business rules
- Examine business rule development and approval process in WebStudio
- Design BPMN-based processes to control rule execution
- Explore engine load balancing options

COURSE TOPICS

- Embedding rules using the BusinessEvents® API
- JUnit for testing BusinessEvents® solutions
- Working with ActiveSpaces® based shared data cache
- Developing rule templates and views in BusinessEvents® Studio
- Building and deploying business rules in WebStudio
- Orchestrating rule execution
- Load Balancing

COURSE PREREQUISITES

- Completion of BE401: Developing CEP Solutions with TIBCO BusinessEvents® 5.1
- Knowledge of Java programming helpful
