

Pega PRPC

Introduction

- Brief Introduction about Pega
- Web Applications
- Purpose of Pega tool
- Understanding 'No Code-Low Code' with Pega
- Understanding 'Build for Change' with Pega
- What is BPM
- What is Process
- BPM Methodology
- Features of Pega
- Installation Procedure

Introduction About Classes

- Abstract Classes
- Concrete Classes
- Class Group
- Types of Inheritance
- Direct and Pattern Inheritance
- Introduction about rules

Working with Application

- Application Creation using Application Express
- Operators
- Class Structure
- App Layer vs Data Layer

Flow Processing

- Work Object Creation
- Types of flows
- Standard Flow
- Screen Flow
- Sub Flows

Working with Properties

- Properties and their types
- Page, Page List and Page Groups properties

Debugging Tools

- Tracer
- Live UI
- Clipboard
- Working with Flow Actions
- Validations

Data types

- Understanding Infrastructure
- Primary keys
- Class Keys
- Pre and Post Processing

Report Definition

- Reporting
- Joins
- Retrieving Data from Tables

Activities

- **Implementing Business Logics**
- **Working On Pages like Primary,**
- **Steps Pages etc**
- **Rule-Obj Methods**
- **List with Report Definition**

Data Transforms

- Implements Business logics
- Sourcing for a List

- When Rules
- Loops
- Expression Builder
- Data Pages
- Declarative Rules
- Source Data Page to List

Rule Sets

- Versions
- Types
- Branches
- Checkouts

Case Management

- Case Types
- Case Designer
- Stages, Process, Steps
- Basic Shapes
- Smart Shapes
- Advanced Shapes
- Covered/Cover Cases
- Processor Modellar

Rule Resolution Algorithm

- Working with an Example
- Availability of Rules
- Class Hierarchy

Packaging

- Export Import Process
- Application Packaging
- RuleSet Packaging
- Private Edits

Integration

- What are Web Services
- Introduction to Connectors SOAP
- Introduction Service SOAP
- Implementing SOAP Connector and Service.
- Introduction to Connectors REST
- Introduction Service REST
- Implementing REST Connector and Service.

Working with External Tables

- RDB Methods

Listeners

- Implementing File listeners
- SQL Connect Rule
