

Power Systems for AIX IV: Performance Management

Day 1

- Performance analysis and tuning overview
- Data collection
- Monitoring, analyzing, and tuning CPU usage

Day 2

- Monitoring, analyzing, and tuning CPU usage (parts 3, 4 and 5)
- Virtual memory performance monitoring and tuning

Day 3

- Physical and logical volume performance
- File system performance monitoring and tuning (topic 1)

Day 4

- File system performance monitoring and tuning (topic 2)
- Network performance

Day 5

- NFS performance
- Performance management methodology
