

Citizen Developer Business Architect (CDBA) Training

Course Contents

This course contains below six modules:

1. **Introduction** - Overview of the Citizen Developer Business Architect Role and Citizen Developer Canvas.
2. **CDBA Profile** - This module gives you an understanding of the CDBA's roles and responsibilities, the key skillsets and experience they require, and where the CDBA fits within the organizational structure.
3. **Operating Model** - This module describes the operating structures that best support the introduction and scaling of citizen development within an organization.
4. **Organizational Alignment** - This module provides the insights and tools needed to successfully implement citizen development within an organization by managing change, generating widespread buy-in, ensuring accountability, managing governance processes overseeing appropriate reporting, and demonstrating the value of citizen development to the organization.
5. **Maturity Model** - This module provides guidance on the roles and responsibilities of the CDBA at each stage of citizen development maturity within an organization.
6. **Conclusion** - Review of course standards and expectations in preparation for the exam.
