

# Android \_\_\_\_\_ Android 8.x

# Security Essentials

# Course Outline

Kotlin

Android  
Studio

- Understand Android's security model and architecture.
- Build Android applications with security best practices in mind.
- Build more robust applications that appeal to clients.
- Build a new Android application for each Android security lesson.

## Lesson 1: Permissions

|                                                    |      |
|----------------------------------------------------|------|
| <b>Introduction</b> .....                          | 1-2  |
| <b>Android Platform Architecture</b> .....         | 1-2  |
| <b>Android Security Architecture</b> .....         | 1-5  |
| Application Signing .....                          | 1-5  |
| Installing Applications .....                      | 1-6  |
| <b>Permissions</b> .....                           | 1-7  |
| Why Permissions? .....                             | 1-7  |
| Enforcing Permissions .....                        | 1-7  |
| Levels of Permissions Protection .....             | 1-8  |
| Application - Level Permissions .....              | 1-12 |
| Component - Level Permissions .....                | 1-16 |
| Extending Android Permissions .....                | 1-23 |
| <b>Lab 1: Permission</b> .....                     | 1-26 |
| Creating and Accessing App Permissions .....       | 1-27 |
| Configuring Permissions Among Different Apps ..... | 1-46 |

## Lesson 2: Managing the Policy File

|                                                        |      |
|--------------------------------------------------------|------|
| <b>Introduction</b> .....                              | 2-2  |
| <b>The Manifest File</b> .....                         | 2-2  |
| Manifest Tag Attributes .....                          | 2-4  |
| Application Tag Attributes .....                       | 2-5  |
| <b>Modifying the Application Policy</b> .....          | 2-8  |
| Application Running with the Same Linux ID .....       | 2-9  |
| Setting Application Permissions .....                  | 2-10 |
| Permissions for External Applications .....            | 2-10 |
| External Storage .....                                 | 2-11 |
| Debugging Mode .....                                   | 2-12 |
| Backup .....                                           | 2-13 |
| <b>Lab 2:</b> .....                                    | 2-14 |
| Creating Two Applications with the Same Linux ID ..... | 2-15 |
| Backing up Data on Cloud Storage .....                 | 2-28 |

## Lesson 3: Users' Data Privacy and Protection

|                                                              |      |
|--------------------------------------------------------------|------|
| <b>Introduction</b> .....                                    | 3-2  |
| <b>Data Security Principles</b> .....                        | 3-2  |
| Confidentiality .....                                        | 3-2  |
| Integrity .....                                              | 3-3  |
| Availability .....                                           | 3-3  |
| <b>The Mobile Environment</b> .....                          | 3-6  |
| <b>Data States</b> .....                                     | 3-8  |
| <b>Vulnerabilities and Attacks Against Stored Data</b> ..... | 3-8  |
| Vulnerabilities of Stored Data .....                         | 3-9  |
| Threats on Stored Data .....                                 | 3-9  |
| <b>Protection Principles</b> .....                           | 3-9  |
| <b>Tips for Android Coding Vulnerabilities</b> .....         | 3-10 |
| <b>Lab 3:</b> .....                                          | 3-11 |
| Ensuring Data Confidentiality - Hacking Applications .....   | 3-12 |
| Protecting Application Data with Permissions .....           | 3-27 |

## Lesson 4: Securing Storage

|                                                     |      |
|-----------------------------------------------------|------|
| <b>Introduction</b> .....                           | 4-2  |
| <b>Data Storage Decisions</b> .....                 | 4-2  |
| Privacy .....                                       | 4-2  |
| Data Storage Period .....                           | 4-2  |
| <b>Storage Mechanisms</b> .....                     | 4-3  |
| SharedPreferences .....                             | 4-3  |
| File .....                                          | 4-5  |
| <b>File Operations on an External Storage</b> ..... | 4-8  |
| <b>Cache</b> .....                                  | 4-8  |
| <b>Database</b> .....                               | 4-10 |
| <b>Lab 4: Data Storage Applications</b> .....       | 4-12 |
| Using SharedPreferences .....                       | 4-13 |
| File Storage Operations .....                       | 4-16 |
| Storing Data in Cache .....                         | 4-37 |
| SQLite Database Storage .....                       | 4-44 |
