

# **Administering Phantom 4.10**

## **Module 1 – Introduction, Deployment and Installation**

- Describe Phantom operating concepts
- Identify documentation and community resources
- Identify installation and upgrade options
- Phantom & Splunk Architecture
- Splunk/Phantom relationships

## **Module 2 – Initial Configuration**

- Product settings
- Access control
- Authentication settings
- Response settings
- Understanding roles
- Creating users
- Managing user access

## **Module 3 – Apps, Assets and Playbooks**

- Describe how apps and assets work in Phantom
- Add and configure new apps
- Configure assets
- Manage playbooks

## **Module 4 – Ingesting Data**

- Assets as data sources
- Configuring data polling
- Labels and tags
- Data ingestion management
- Event settings

## **Module 5 – Analyst Queue**

- Work with the analyst queue
- Filtering and sorting
- Using search
- Container export and import
- Aggregation settings

## **Module 6 – Investigation**

- Use the investigation page to work on events
- Use indicators to find matching artifacts in multiple events
- Using the heads-up display
- Using notes

## **Module 7 – Actions, Playbooks and Files**

- Manually run actions and examine action results
- Manually run playbooks
- Use the vault to store related files

## **Module 8 – Case Management and Workbooks**

- Use case management for complex investigations
- Use case workflows
- Define new workbooks
- Customize case management

## **Module 9 – Customization**

- Create custom severity levels
- Create custom status levels
- Add custom fields and CEF settings
- Create custom workbooks

## **Module 10 – Advance Topics**

- Run reports
- Use Phantom audit tools
- Monitor system health
- Define clustering best practices
- Configure multi-server Phantom clusters
- Configure multi-tenancy
- Backup/restore
