## vii Course Overview

### 1 Unit 1: SAP Business Technology Platform (BTP)

1 Lesson: Introducing SAP Business Technology Platform (BTP)

### 3 Unit 2: Development Environment and CAP-Project

3 Lesson: Getting Started

3 Lesson: Explaining the SAP BTP Account Model

3 Lesson: Explaining SAP BTP Environments

3 Lesson: Describing SAP Business Application Studio (BAS)

3 Lesson: Creating a CAP-Based Service

3 Lesson: Describing OData

4 Lesson: Using APIs

4 Lesson: Explaining JSON/YAML

### 5 Unit 3: User Interface and Business Logic

5 Lesson: Generating a User interface

5 Lesson: Explaining UIs: SAP Fiori

5 Lesson: Explaining UIs: Elements Versus SAP Fiori

5 Lesson: Adding Custom Business Logic

5 Lesson: Evaluating the Use of Event Handling

5 Lesson: Explaining Error Handling

### 7 Unit 4: External Services

7 Lesson: Adding an External Service

7 Lesson: Describing SAP BTP Connectivity

7 Lesson: Using the SAP Cloud Connector

### 9 Unit 5: Manual Deployment

9 Lesson: Performing a Manual Deployment

9 Lesson: Describing Cloud Foundry in an Overview

9 Lesson: Using a BTP Management Tool: CF CLI

### 11 Unit 6: Authorization and Trust Management

11 Lesson: Defining CDS Restrictions and Roles

11 Lesson: Setting Up SAP Authorization and Trust Management

11 Lesson: Describing Authorization and Trust Management

11 Lesson: Creating and Configuring an Application Router

11 Lesson: Adding the UI and Approuter Module to the MTA

11 Lesson: Assigning Role Collections

**13 Unit 7: Automated Deployment**

- 13 Lesson: Creating and Connecting a GitHub Repository
- 13 Lesson: Describing Continuous Integration and Delivery
- 13 Lesson: Enabling SAP Continuous Integration and Delivery
- 13 Lesson: Configuring a CI/CD Job
- 13 Lesson: Configuring Stages of the CI/CD Pipeline
- 13 Lesson: Verifying the Build Success

**15 Unit 8: Connection of an SAP S/4HANA Cloud System as an External Service for CAP**

- 15 Lesson: Connecting an SAP S/4HANA Cloud System as an External Service for CAP

# Course Overview

## **TARGET AUDIENCE**

This course is intended for the following audiences:

- Application Consultant
- Development Consultant
- Super / Key / Power User
- Business Process Architect
- Business Process Owner/Team Lead/Power User
- Developer
- Enterprise Architect
- Solution Architect

## Lesson 1: Introducing SAP Business Technology Platform (BTP)

### Lesson Objectives

After completing this lesson, you will be able to:

- Explain the SAP Business Technology Platform

## Lesson 1: Getting Started

### Lesson Objectives

After completing this lesson, you will be able to:

- Get ready to build your extension project

## Lesson 2: Explaining the SAP BTP Account Model

### Lesson Objectives

After completing this lesson, you will be able to:

- Explain the SAP BTP account model

## Lesson 3: Explaining SAP BTP Environments

### Lesson Objectives

After completing this lesson, you will be able to:

- Identify the most suitable SAP BTP environment for a new cloud application project

## Lesson 4: Describing SAP Business Application Studio (BAS)

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe key capabilities of SAP Business Application Studio (BAS)

## Lesson 5: Creating a CAP-Based Service

### Lesson Objectives

After completing this lesson, you will be able to:

- Create a CAP-based service

## Lesson 6: Describing OData

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe the OData standard for web-based applications

## **Lesson 7: Using APIs**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Use APIs to exchange information in a standardized way

## **Lesson 8: Explaining JSON/YAML**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Explain JSON and YAML

## Lesson 1: Generating a User interface

### Lesson Objectives

After completing this lesson, you will be able to:

- Generate a User Interface (UI) using SAP Fiori Elements

## Lesson 2: Explaining UIs: SAP Fiori

### Lesson Objectives

After completing this lesson, you will be able to:

- List the design principles and key benefits of SAP Fiori

## Lesson 3: Explaining UIs: Elements Versus SAP Fiori

### Lesson Objectives

After completing this lesson, you will be able to:

- Evaluate the difference between SAP Fiori and SAP Fiori Elements

## Lesson 4: Adding Custom Business Logic

### Lesson Objectives

After completing this lesson, you will be able to:

- Add custom business logic

## Lesson 5: Evaluating the Use of Event Handling

### Lesson Objectives

After completing this lesson, you will be able to:

- Evaluate when to use event handlers

## Lesson 6: Explaining Error Handling

### Lesson Objectives

After completing this lesson, you will be able to:

- Explain error handling

## Lesson 1: Adding an External Service

### Lesson Objectives

After completing this lesson, you will be able to:

- Add and consume an external service

## Lesson 2: Describing SAP BTP Connectivity

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe how SAP BTP applications can securely access remote services

## Lesson 3: Using the SAP Cloud Connector

### Lesson Objectives

After completing this lesson, you will be able to:

- Manage connections between back end systems and SAP BTP

## Lesson 1: Performing a Manual Deployment

### Lesson Objectives

After completing this lesson, you will be able to:

- Perform a manual deployment

## Lesson 2: Describing Cloud Foundry in an Overview

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe the Cloud Foundry environment

## Lesson 3: Using a BTP Management Tool: CF CLI

### Lesson Objectives

After completing this lesson, you will be able to:

- Use the Cloud Foundry Command Line Interface (CF CLI)

## Lesson 1: Defining CDS Restrictions and Roles

### Lesson Objectives

After completing this lesson, you will be able to:

- Define CDS Restrictions and Roles

## Lesson 2: Setting Up SAP Authorization and Trust Management

### Lesson Objectives

After completing this lesson, you will be able to:

- Set Up SAP Authorization and Trust Management

## Lesson 3: Describing Authorization and Trust Management

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe the SAP Authorization and Trust Management Service

## Lesson 4: Creating and Configuring an Application Router

### Lesson Objectives

After completing this lesson, you will be able to:

- Create and configure an approuter

## Lesson 5: Adding the UI and Approuter Module to the MTA

### Lesson Objectives

After completing this lesson, you will be able to:

- Add the UI and approuter module to the MTA

## Lesson 6: Assigning Role Collections

### Lesson Objectives

After completing this lesson, you will be able to:

- Assign role collections

## **Lesson 1: Creating and Connecting a GitHub Repository**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Create and connect a GitHub repository

## **Lesson 2: Describing Continuous Integration and Delivery**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Describe the principles and benefits of continuous integration and delivery

## **Lesson 3: Enabling SAP Continuous Integration and Delivery**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Enable SAP Continuous Integration and Delivery

## **Lesson 4: Configuring a CI/CD Job**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Configure a job in the SAP Continuous Integration and Delivery service

## **Lesson 5: Configuring Stages of the CI/CD Pipeline**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Configure stages of the CI/CD pipeline

## **Lesson 6: Verifying the Build Success**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Start monitoring a job in SAP Continuous Integration and Delivery

## Lesson 1: Connecting an SAP S/4HANA Cloud System as an External Service for CAP

### Lesson Objectives

After completing this lesson, you will be able to:

- Connect your app to the productive Business Partner API of your SAP S/4HANA Cloud system
