Contents

vii **Course Overview**

1 Unit 1: Explaining the Basics of Data Structures in SAP Analytics Cloud

- 1 Lesson: Describing Data Modeling Basics
- 1 Lesson: Identifying the Differences Between Model Structures
- 1 Lesson: Explaining the Difference Between Import and Live Model Types
- 1 Lesson: Creating Datasets

3 Unit 2: Designing and Creating Dimensions

- 3 Lesson: Defining Dimensions
- 3 Lesson: Identifying Dimension Types
- 3 Lesson: Describing Properties
- 3 Lesson: Designing and Creating Hierarchies
- 3 Lesson: Importing and Wrangling Master Data to a Dimension

5 Unit 3: Creating Import Models

- 5 Lesson: Creating an Import Model
- 5 Lesson: Importing and Wrangling Transactional Data in a Model
- 5 Lesson: Scheduling Data Imports
- 5 Lesson: Creating Formulas and Calculations
- 5 Lesson: Translating Currency
- 6 Lesson: Designing and Creating Time Hierarchies

7 Unit 4: Creating Live Models

- 7 Lesson: Using Data Analyzer to Preview Your Live Data Structure
- 7 Lesson: Creating Live Models

9 Unit 5: Working with Geographic Data

- 9 Lesson: Configuring Geographic Data in a Model

11 Unit 6: Defining Data Security

- 11 Lesson: Defining Data Access

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Data Manager
- Data Consultant
- Industry / Business Analyst Consultant
- Database Administrator
- System Architect

Lesson 1: Describing Data Modeling Basics

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the foundational concepts for data modeling

Lesson 2: Identifying the Differences Between Model Structures

Lesson Objectives

After completing this lesson, you will be able to:

- Identify the different model structures

Lesson 3: Explaining the Difference Between Import and Live Model Types

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the model types and data sources

Lesson 4: Creating Datasets

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the types of datasets and the difference between datasets and models
- Create a dataset

Lesson 1: Defining Dimensions

Lesson Objectives

After completing this lesson, you will be able to:

- Explain private and public dimensions and the difference between dimensions and measures

Lesson 2: Identifying Dimension Types

Lesson Objectives

After completing this lesson, you will be able to:

- Explain account, organization, generic, data and version data types

Lesson 3: Describing Properties

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the unique properties for dimension types

Lesson 4: Designing and Creating Hierarchies

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the prerequisites required for creating hierarchies
- Create a dimension and hierarchy

Lesson 5: Importing and Wrangling Master Data to a Dimension

Lesson Objectives

After completing this lesson, you will be able to:

- Import and wrangle data in a dimension

Lesson 1: Creating an Import Model

Lesson Objectives

After completing this lesson, you will be able to:

- Create an import model

Lesson 2: Importing and Wrangling Transactional Data in a Model

Lesson Objectives

After completing this lesson, you will be able to:

- Explain data transformation functions in an import model
- Import data into a model

Lesson 3: Scheduling Data Imports

Lesson Objectives

After completing this lesson, you will be able to:

- Schedule data import

Lesson 4: Creating Formulas and Calculations

Lesson Objectives

After completing this lesson, you will be able to:

- Explain calculations created for import models
- Create calculated measures in a model

Lesson 5: Translating Currency

Lesson Objectives

After completing this lesson, you will be able to:

- Configure and translate currencies

Lesson 6: Designing and Creating Time Hierarchies

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the prerequisites required for creating hierarchies
- Build custom time hierarchies

Lesson 1: Using Data Analyzer to Preview Your Live Data Structure

Lesson Objectives

After completing this lesson, you will be able to:

- Access data for your model with the data analyzer

Lesson 2: Creating Live Models

Lesson Objectives

After completing this lesson, you will be able to:

- Create a live model with S/4HANA data
- Create a live model with with HANA data
- Create a live model with SAP Business Warehouse data
- Create a live model using SAP BusinessObjects data

Lesson 1: Configuring Geographic Data in a Model

Lesson Objectives

After completing this lesson, you will be able to:

- Configure data for a geo map

Lesson 1: Defining Data Access

Lesson Objectives

After completing this lesson, you will be able to:

- Apply data access control
