

Nintex Automation Cloud Fundamentals

Course Description

Welcome to the Nintex Automation Cloud Fundamentals course. This foundational course is designed for beginners looking to kickstart their journey with Nintex Automation Cloud. Through this course, you'll gain a solid understanding of the fundamental concepts and practices necessary for building workflows, creating basic forms, using actions, working with variables, and running and publishing workflows in the Nintex Automation Cloud environment. Whether you're new to automation or seeking to build a strong foundation, this course is your gateway to mastering Nintex Automation Cloud.

Audience

Get started with Nintex Cloud Automation through our fundamental course. This course is designed for beginners, introducing you to the core concepts and practices of Nintex Cloud. You'll learn how to build workflows, create basic forms, use actions in workflows, work with variables, and run and publish workflows. Whether you're new to automation or looking to build a strong foundation in Nintex Cloud, this course is your starting point.

Pre-requisite Knowledge/Skills

Basic understanding of business processes and workflows

Familiarity with low-code or no-code development concepts is beneficial but not mandatory

Course Objectives

By the end of this course, participants will be able to:

- Understand Nintex Automation Cloud, its capabilities, and benefits.
- Build workflows, including planning and design.
- Create basic forms that integrate with workflows.
- Utilize essential workflow actions in Nintex Automation Cloud.
- Work with variables, creating and managing basic variables.
- Run and test workflows to ensure desired outcomes.
- Publish workflows to make them accessible to end-users.

Course Outline

The course comprises 8 hours of theory and labs. It's divided into 10 different modules.

Module 1: Introducing Automation Cloud

- Understanding the Automation Cloud Environment

Module 2: Building Workflows in Nintex Cloud

- Know your process
- Planning the workflow
- Building the workflow

Module 3: Building a Form

- Build a basic form
- Start your workflow from your form

Module 4: Using Actions in Workflow

- Exploring the essential actions in Nintex Cloud

Module 5: Introducing Variables in Workflows

- Understanding the role of variables in workflow design
- Creating and managing basic variables

Module 6: Running Workflow

- Initiating and testing your workflows

Module 7: Publishing the Workflow

- Making your workflows accessible to end-users
