UiPath - Test Manager

The course is divided into 6 lessons:

1. Introducing UiPath Test Manager

2. The Test Manager User Interface

3. The Requirements Module

4. Creating and Executing Manual Test Cases

5. Linking and Executing Automated Test Cases

6. Test Results and Reporting in Test Manager

Labs

The Lab component of the course consists of exercises mapped to the Theory portion. Each exercise helps the student practice and apply the skills learned in the Theory section of the course.
