

Microsoft Power Pages

Advance

Duration: 32 Hours (4 Days)

Pre-requisites: Power Platform Fundamental knowledge is required along with understanding of HTML/CSS/JavaScript

Course Overview:

For years, Power Apps portals have offered users an end-to-end experience to create external portals quickly and confidently, and customize them with pages, layouts, and content. As a new, standalone product, **Microsoft Power Pages** empowers anyone, regardless of their technical background, with an effective platform to create data-powered, modern, and secure websites.

This course is designed keeping in mind the professionals from all backgrounds - hence we cover everything from basics, and gradually progress towards advanced topics.
