

RecoverPoint for Virtual Machines Implementation and Administration

Course Description

Course Duration

2 Days

Overview

This course covers how to implement, manage and monitor a RecoverPoint for Virtual Machines solution. Deployment activities including planning, installation, and configuration are covered in this course. Management activities such as testing images for remote access, creating bookmarks, and failover and production recovery operations are also covered. Finally, this course covers the methods for determining the health of a RecoverPoint for VMs system, methods to troubleshoot vRPA connectivity issues and diagnose RecoverPoint for VMs system performance issues.

Audience

This course is intended for individuals who require the skills needed to install, administrate, and troubleshoot a RecoverPoint for Virtual Machines system.

Prerequisite Knowledge/Skills

An understanding of RecoverPoint for Virtual Machines concepts is required.

Course Objectives

Upon successful completion of this course, participants should be able to:

- Describe the architecture of a RecoverPoint for Virtual Machines System.
- Illustrate the data flow and processes used by RecoverPoint for Virtual Machines when protecting Virtual Machines.
- Explain the concepts of replication and recovery with RecoverPoint for Virtual Machines.
- Describe the critical aspects in planning for and deploying a RecoverPoint for VMs System.
- Describe the methods for installing a RecoverPoint for Virtual Machines System using the RecoverPoint for VMs Deployer.
- List the requirement for licensing and registering a RecoverPoint for VMs System.
- Describe the procedures to protect Virtual Machines using RecoverPoint for VMs.
- Describe the recovery procedures used with RecoverPoint for VMs.

RecoverPoint for Virtual Machines Implementation and Administration

Course Description

Course Duration

2 Days

- List the methods for determining the health of a RecoverPoint for VMs system.
- Explain the methods used to troubleshoot vRPA connectivity issues.
- Diagnose RecoverPoint for VMs system performance issues.

Course Outline

The content of this course is designed to support the course objectives.

- RecoverPoint for VMs Concepts
- RecoverPoint for VMs Data Flow
- RecoverPoint for Virtual Machines Replication Concepts
- RecoverPoint for Virtual Machines Implementation
- Pre-Deployment Considerations
- RecoverPoint for Virtual Machines Cluster Installation
- RecoverPoint for Virtual Machines Cluster Licensing and Registration
- RecoverPoint for Virtual Machines Administration
- Protecting a Virtual Machine
- Editing Consistency Group's Properties
- RecoverPoint for Virtual Machines Recovery Methods
- Monitoring RecoverPoint for VMs
- VM Automation and Orchestration
- Recovery of Virtual Machines with RecoverPoint for VMs
- Additional Administration Topics for RecoverPoint for VMs
- Troubleshooting RecoverPoint for VMs Environment
- RecoverPoint for VMs Performance Troubleshooting
