Mastering in RPA design and development with UiPath.

Lesson 1: Robotic Process Automation Basics

Lesson 2: Introduction to UiPath

Lesson 3: Variables and Arguments

Lesson 4: Input Activities and Input Methods

Lesson 5: UI Synchronization Activities

Lesson 6: Selectors

Lesson 7: Control Flow

Lesson 8: Data Manipulation

Lesson 9: Project Organization, Debugging, and Error Handling

Lesson 10: Utilizing External Code

Lesson 11: Structured Data and Extraction Wizard

Lesson 12: Automation Concepts and Techniques

Lesson 13: Orchestrator

Lesson 14: Robotic Enterprise Framework
