

DP-600: Implementing Analytics Solutions Using Microsoft Fabric

Modules :

1. Introduction to end-to-end analytics using Microsoft Fabric
2. Administer Microsoft Fabric
3. Ingest Data with Dataflows Gen2 in Microsoft Fabric
4. Ingest data with Spark and Microsoft Fabric notebooks
5. Use Data Factory pipelines in Microsoft Fabric
6. Get started with lakehouses in Microsoft Fabric
7. Organize a Fabric lakehouse using medallion architecture design
8. Use Apache Spark in Microsoft Fabric
9. Work with Delta Lake tables in Microsoft Fabric
10. Secure your lakehouse (content is in admin mod)
11. Get started with data warehouses in Microsoft Fabric

12. Load data into a Fabric data warehouse

13. Query a data warehouse in Microsoft Fabric

14. Monitor and optimize a Microsoft Fabric data warehouse

15. Model a data warehouse in Microsoft Fabric

16. Secure your warehouse

17. Understand scalability in Power BI

18. Create Power BI model relationships

19. Use tools to optimize Power BI performance

20. Enforce Power BI model security
