

App in a Day

As a business leader, you need to react quickly to the changing market and cannot stay dependent on developing a software solution to do that. You want the ability to build a solution to meet your business needs swiftly. With Microsoft Power Platform, you can build great business apps without writing code.

In this workshop, you'll better understand how to:

- Digitize business processes, work more efficiently and become more paperless. With Power Apps, you'll easily build and deploy custom business apps in both canvas and model-driven style of apps.
- Easily connect all your applications and share data. With Microsoft Dataverse, you'll enable your line-of-business specialists to easily bring your data together and quickly create powerful apps using a compliant and scalable data service and app platform integrated right into Power Apps.
- Automate and optimize your business processes. With Power Automate as your business service, your line-of-business specialists and IT professionals can build automated workflows intuitively.

At the end of the training, you'll be able to:

- Create custom business applications without writing code.
- Learn how to build sophisticated business processes and complex data relationships within your applications.
- Learn how to connect your app to a variety of data sources to bring it to life.
- Share your apps inside your organization securely.
