

Administrator in a Day Microsoft Power Platform

Prerequisite:

App in a Day course, basic cloud applications administration background, or equivalent work experience with Microsoft Power Platform.

Course Description:

This one-day course covers how to be a successful administrator of the Microsoft Power Platform tenant. During this lab, attendees learn how to:

- Secure their tenant.
- Create and optimize reports and telemetry to support data-driven decision making.
- Create automation for administration tasks.
- Deploy an app.
