

Power BI Developer in a Day

Prerequisites:

Software Development fundamentals, DIAD or equivalent working experience

Course Description:

The Power BI Developer in a Day course will empower attendees with the technical knowledge required to embed Power BI content. This course is designed specifically for experienced app developers, and familiarity with front-end coding is an advantage. Access the full online training.

The course covers these topics:

- Acquire access using Azure Active Directory (Azure AD) apps and tokens.
- Work with the Power BI REST API.
- Embed Power BI content in your apps.
- Integrate Power BI content in your apps using the Power BI JavaScript API.
- Enforce row-level security (RLS) to ensure app users see the right data.
- Choose the right license to suit your requirements.

Course Modules:
