

## **ONTAP Security and Compliance Solutions Administration**

### **Module 1: Security Concepts**

Security threats

- Security standards and regulations
- Security defenses
- Zero Trust

### **Module 2: ONTAP Management Security**

ONTAP authentication

- Role based access control
- Multifactor authentication

### **Module 3: ONTAP Network Security**

NAS network security

- Securing in-flight data
- Logical network interfaces
- SAN network security
- iSCSI security
- NVMe security

### **Module 4: ONTAP Storage Security**

Encrypting data at rest

- NetApp Storage Encryption
- NetApp Volume Encryption

- Key management

### **Module 5: ONTAP Data Retention**

SnapLock compliance software

- Managing SnapLock volumes
- Protecting SnapLock volumes
- Advanced SnapLock features

### **Module 6: ONTAP NAS Security**

Securing In-flight NFS data

- NFS user authentication
- NFS user authorization
- Securing in-flight SMB data

SMB user authentication

- SMB user authorization
- Storage-Level Access Guard
- Auditing and logging
