

# Domo Professional Training

This course prepares you for Domo Professional Certification v2.0.

## Course Description:

Start here if you're a business user who is building cards and dashboards, using the Domo platform features to manage by exception and make decisions from your data. Here you'll learn to be a Domo power-user focused on business and analytic insights. You'll dig deeper into the data and discuss insights found in your visualizations, and help others across your organization get the most they can out of their data.

**Duration:** 3 Days

## This training will cover:

### Domo Basics

- Getting Started in Domo
- The Domo Interface
- Data Literacy
- Using the Domo Data Center
- Working with DataSets
- Understanding the Domo Appstore
