

# VMware Horizon Cloud Service: Deploy and Manage on Microsoft Azure

## Course Overview

This five-day, hands-on training provides you with the knowledge, skills, and abilities to achieve competence in deploying and managing VMware Horizon® Cloud Service™ on Microsoft Azure. This training increases your skills and competence in using the VMware Horizon® Cloud Administration Console and Microsoft Azure portal.

Through a combination of hands-on labs and interactive lectures, you learn how to import and manage images for VDI and RDSH assignments. You also learn how to configure and use the Universal Broker function, VMware App Volumes™, Workspace ONE Access and VMware Dynamic Environment Manager™ in the Horizon Cloud Service on Microsoft Azure deployment.

## Course Objectives

By the end of the course, you should be able to meet the following objectives:

- Describe the architecture of Horizon Cloud Service on Microsoft Azure
- Discuss the initial Microsoft Azure configurations required for the Horizon Cloud Service on Microsoft Azure deployment
- Discuss Horizon Cloud Service on Microsoft Azure networking concepts
- Discuss Horizon Cloud Service on Microsoft Azure AD requirements and integration best practices
- Determine steps and requirements to deploy or upgrade Horizon Cloud Service on Microsoft Azure
- Recognize Horizon Cloud Service console controls that are available for administrators
- Identify Horizon Cloud upgrade features and benefits
- List the steps and considerations to take when setting up a primary VM to be used as an assignable image
- Identify how to access desktops and application from Horizon Cloud Service on Microsoft Azure
- Discuss and create Remote Desktop Session Host Farms
- Explain power management options in the RDSH farm
- Create VDI desktop assignments and entitlements
- Manage assignable images on Horizon Cloud Service on Microsoft Azure
- Describe and Use Image management service for Horizon Cloud Service on Microsoft Azure
- Describe the integration of Dynamic Environment Manger with Horizon Cloud Service on Microsoft Azure
- Manage user personalization and application configurations using the Dynamic Environment Manager management console and application profiler
- Discuss the usage of App Volumes for Horizon Cloud Service on Microsoft Azure
- Discuss the integration of Workspace ONE Access with Horizon Cloud Service on Microsoft Azure
- Interpret scalability considerations for Horizon Cloud Service on Microsoft Azure
- Determine the process of deploying, configuring, and paring Horizon Cloud Connector into your pod's environment

- Apply troubleshooting techniques relevant to Horizon Cloud Service and Microsoft Azure
- Summarize the analytics and monitoring capabilities in Horizon Cloud Service on Microsoft Azure

### Target Audience

Horizon Cloud Service on Microsoft Azure administrators, system integrators, account managers, solutions architects, solutions engineers, sales engineers, and consultants.

### Prerequisites

This course has no prerequisites.

### Course Delivery Options

- Classroom
- Live Online
- [Private Training](#)

### Product Alignment

- VMware Horizon Cloud Service on Microsoft Azure

## Course Modules

### 1 Course Introduction

- Introduction and course logistics
- Course objectives

### 2 Introduction to Horizon Cloud Service on Microsoft Azure

- Identify Horizon Cloud Service on Microsoft Azure features, benefits, and licensing options.
- Interpret Horizon Cloud Service on Microsoft Azure architecture components to identify configuration prerequisite
- Interpret Horizon Cloud Service on Microsoft Azure deployment models
- Discuss the initial Microsoft Azure configurations required for the Horizon Cloud Service on Microsoft Azure deployment

### 3 Microsoft Azure Networking Requirements

- Summarize Horizon Cloud connectivity considerations and tasks
- Discuss Horizon Cloud on Microsoft Azure networking concepts
- Identify ports required for local connections, remote connections, and endpoint operating system firewall rules

### 4 Active Directory

- List the features and limitations of supported AD configurations
- Discuss Horizon Cloud Service on Microsoft Azure AD integration best practices
- Determine Horizon Cloud Service on Microsoft Azure AD requirements

### 5 Deployment and Upgrades

- Determine steps and requirements to deploy Horizon Cloud Service on Microsoft Azure
- Discuss the features and benefits of using multiple tenant subnets for desktops and RDSH
- Discuss the features and benefits of using Internal and External UAG
- Recognize Horizon Cloud Service console controls that are available for administrators

- Identify Horizon Cloud upgrade features and benefits

### 6 Creating Images

- Outline the process and choices to set up primary VMs
- Identify the configuration choices for importing primary VMs
- List steps to install the user software on the primary VM
- Identify steps to convert a configured primary VM to an assignable image

### 7 Access Desktops and Applications

- Use Horizon Client to access desktops and remote applications
- Compare the remote display protocols that are available for Horizon Cloud

### 8 Remote Desktop Session Host Farms

- List the steps and considerations to take when creating an RDSH farm
- List the actions that can be performed on farms listed on the console's Farms page
- List the actions to assign an application to a user or group
- List the prerequisites and steps to create an RDSH session assignment

### 9 VDI Desktops

- Compare a dedicated assignment to floating assignment
- Outline steps to create a VDI desktop assignment
- Explain the entitlement of desktops

### 10 Managing Assignable Images

- Describe and manage assignable images
- Describe and Use Image management service for Horizon Cloud Service on Microsoft Azure

### 11 VMware Dynamic Environment Manager

- Identify the VMware Dynamic Environment Manager functional areas and their benefits
- Prepare an infrastructure for VMware Dynamic Environment Manager

VMware, Inc. 3401 Hillview Avenue Palo Alto CA 94304 USA Tel 877-486-9273 Fax 650-427-5001 [www.vmware.com](http://www.vmware.com)

THE EXPRESS WARRANTY SET FORTH IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE SERVICES AND DELIVERABLES PROVIDED BY VMWARE, OR AS TO THE RESULTS WHICH MAY BE OBTAINED THEREFROM. VMWARE WILL NOT BE LIABLE FOR ANY THIRD-PARTY SERVICES OR PRODUCTS IDENTIFIED OR REFERRED TO CUSTOMER. All materials provided in this workshop are copyrighted by VMware ("Workshop Materials"). VMware grants the customer of this workshop a license to use and make reasonable copies of any Workshop Materials strictly for the purpose of facilitating such company's internal understanding, utilization, and operation of its licensed VMware product(s). Except as set forth expressly in the sentence above, there is no transfer of any intellectual property rights or any other license granted under the terms of this workshop. If you are located in the United States, the VMware contracting entity for the service will be VMware, Inc., and if outside of the United States, the VMware contracting entity will be VMware International Limited.

- Outline the steps that are required to install and configure Dynamic Environment Manager components
- Manage user personalization and application configurations using the Dynamic Environment Manager management console and application profiler

## 12 App Volumes for Horizon Cloud Service on Microsoft Azure

- Explain how App Volumes works with Horizon Cloud Service on Microsoft Azure
- Identify the features and benefits of App Volumes in Horizon Cloud Service on Microsoft Azure
- Identify the interface elements of App Volumes in Horizon Cloud Service on Microsoft Azure
- Install and configure App Volumes in Horizon Cloud Service on Microsoft Azure

## 13 Workspace ONE Access

- Describe the benefits of integrating VMware Horizon Cloud service with Workspace ONE Access.
- Describe how a user obtains access to an entitled virtual desktop or application from the Intelligent Hub catalog.
- Describe the importance of binding directory with Workspace ONE Access and setting up custom user attribute synchronization.
- Describe the importance of configuring the Remote App Access Client in Workspace ONE Access.
- Summarize the steps of configuring the Access settings in Horizon Cloud control panel.
- Access an entitled Horizon virtual desktop or application in the Intelligent Hub catalog.

## 14 Scalability Considerations

- Discuss the Horizon Cloud Service on Microsoft Azure scalability cost and settings
- Describe the usage of Universal Broker in Horizon Cloud Service on Microsoft Azure

## 15 Horizon Cloud Connector

- Describe the features and benefits of Horizon Cloud Connector
- List the prerequisites and requirements to connect a Horizon pod with Horizon Cloud Connector
- Determine the process of deploying, configuring, and paring Horizon Cloud Connector into your pod's environment

## 16 Troubleshooting Horizon Cloud Service on Microsoft Azure

- Discuss Horizon Cloud Service on Microsoft Azure troubleshooting basics
- Discuss Horizon Cloud Service troubleshooting basics
- Summarize the analytics and monitoring capabilities in Horizon Cloud Service on Microsoft Azure
