

<b>Course Name</b>	<b>Applications of Machine Learning with Julia</b>
<b>Course Duration</b>	1 Day (40 hours)
<b>Target Audience</b>	Data Scientist, ML Engineer
<b>Course Outcomes</b>	Apply machine learning to various use cases.
	Build models for visual question answering.
	Create models for handwriting recognition and sentiment analysis.
	Develop skills in language modeling and image classification.

<b>Module</b>	<b>Content</b>
1	Introduction to Machine Learning
2	Visual Questions and Answering
3	Handwriting recognition
4	Sentiment Analysis
5	Language Modelling
6	Image Classification
