

Course Name	Applications of Machine Learning with Julia
Course Duration	1 Day (40 hours)
Target Audience	Data Scientist, ML Engineer
Course Outcomes	Apply machine learning to various use cases.
	Build models for visual question answering.
	Create models for handwriting recognition and sentiment analysis.
	Develop skills in language modeling and image classification.

Module	Content
1	Introduction to Machine Learning
2	Visual Questions and Answering
3	Handwriting recognition
4	Sentiment Analysis
5	Language Modelling
6	Image Classification
