

## integrating Cloud Services(Intune) with Microsoft endpoint Configuration Manager

- Describe the features of Configuration Manager, and explain how you can use these features to manage PCs and mobile devices in an enterprise environment
  - Analyze data by using queries and reports
  - Prepare a management infrastructure, including configuring boundaries, boundary groups, and resource discovery, and integrating mobile-device management with Microsoft Exchange Server
  - Deploy and manage the Configuration Manager client
  - Co-Management With Intune
- 
- Configure, manage, and monitor hardware and software inventory, and use Asset Intelligence and software metering
  - Identify and configure the most appropriate method to distribute and manage content used for deployments
  - Distribute, deploy, and monitor applications for managed users and systems
  - Maintain software updates for PCs that Configuration Manager manages
  - Implement Endpoint Protection for managed PCs
  - Manage configuration items, baselines, and profiles to assess and configure compliance settings and data access for users and devices
  - Configure an operating-system deployment strategy by using Configuration Manager
  - Manage and maintain a Configuration Manager site
