- 1. Introduction to Power BI
 - Overview of Power BI
 - Key Concepts and Components
 - Power BI Desktop vs. Power BI Service
- 2. Data Preparation and Modelling
 - Connecting to Data Sources
 - Data Transformation and Cleaning
 - Creating Relationships between Tables
 - Implementing Calculated Columns and Measures
 - Using Hierarchies and Date Tables
- 3. Building Visualizations
 - Introduction to Visualizations in Power BI
 - Basic Charts and Graphs
 - Formatting and Customizing Visuals
 - Creating Interactive Reports with Slicers and Filters
 - Working with Maps and Geospatial Data
- 4. Advanced Data Analysis and Modelling
 - Advanced DAX Functions and Formulas
 - Time Intelligence Functions
 - Using Advanced Data Modelling Techniques
 - Working with Multiple Data Tables
 - Data Analysis Expressions (DAX) Studio
- 5. Sharing and Collaboration
 - Publishing Reports to Power BI Service
 - Creating and Managing Dashboards
 - Configuring Row-Level Security (RLS)
 - Collaborating with Power BI Workspaces
 - Sharing and Exporting Reports
- 6. Power BI Mobile App
 - Overview of Power BI Mobile App
 - Accessing Reports on Mobile Devices
 - Interacting with Dashboards and Reports
 - Using Mobile Features and Settings
- 7. Power BI and Data Governance
 - Introduction to Data Governance in Power BI
 - Implementing Data Refresh and Scheduled Refresh
 - Configuring and Managing Gateways
 - Monitoring and Auditing Power BI Usage
 - Data Security and Compliance Best Practices
- 8. Power BI Tips and Tricks
 - Performance Optimization Techniques
 - Using Custom Visualizations and Extensions
 - Power BI Keyboard Shortcuts
 - Troubleshooting Common Issues
 - Useful Resources and Community Support
