SAP Master Data Governance: Configuration and Customizing

Content

- MDG Data Quality Management
  - Outline the core processes of data quality management with SAP MDG on SAP S/4HANA
  - Explain master data quality: evaluations, scores, and dimensions
  - Describe how machine learning has been applied in data quality management
- MDG Data Quality Enhancements
  - Explain search and duplicate checks
  - Explain concepts of BRFplus
  - Explain derivations, validations, and checks
- MDG Process Modeling
  - Explain workflow basics
  - Explore concepts of process modeling with rule-based workflow
- MDG Data Replication
  - Consider data export and data import via data transfer
  - Explain concepts of key and value mapping
  - Explain replication usage
  - Explain the configuration setup
- MDG Custom Objects and MDG Extensibility
  - Explore data modeling concepts
  - Explain data transfer
  - Configure user interfaces
- MDG Customizing, Setup and Project Strategies
  - Activate and configure the default processes for MDG
  - Explain and use advanced customizing
  - Explain the new and updated functionality that is offered with MDG
  - Start first MDG projects that use the standard data models
