Umbraco Training Content

Day 1: Introduction to Umbraco

What is Umbraco: Overview of the Umbraco CMS and its features.

Understanding the Umbraco Interface: Navigating the back-end and understanding the different sections.

Content Organization: Creating a content hierarchy using document types and templates.

Day 2: Content Management in Umbraco

Creating and Editing Content: Using the rich text editor and media library to manage content.

Media Management: Uploading and managing images, videos, and other media assets.

Content Versioning: Understanding version control and content approval workflows.

Day 3: Umbraco Templating and Design

Introduction to Razor: Understanding the Razor syntax used in Umbraco templates.

Creating Templates: Building custom templates for different content types.

Front-End Integration: Integrating the templates with HTML, CSS, and JavaScript.

Day 4: Extending Umbraco Functionality

Document Types and Data Types: Creating custom document types and data types to handle specific content.

Packages and Plugins: Exploring the Umbraco package ecosystem and installing useful plugins.

Forms and User Input: Adding forms to collect user input and processing form submissions.

Day 5: Advanced Topics and Best Practices

Multilingual Websites: Implementing multilingual support in Umbraco.

Search Engine Optimization (SEO): Optimizing content and settings for better search engine visibility.

User Permissions and Security: Managing user roles and permissions for content editors.

Troubleshooting and Maintenance: Identifying and resolving common issues and performing regular maintenance tasks.
