

# ANGULAR 16

Table of contents:

## 1: Single Page Applications, Why Angular and Project Setup

- Course Overview
- Introduction to SPA
- What do we need Angular for?
- Setting up the Development Environment.
- Angular Application Architecture
- Angular CLI
- Project Structure

## 2: Angular Modules and Angular Components

- Working with Modules
- @Component
  - Angular Components and the @Component Decorator
  - Creating an Angular Component using the Angular CLI
  - Component Decorator Metadata
  - Stable Standalone Components API (new feature)
- Data/Property Binding
  - Interpolation
  - Property Binding
  - Event Binding
  - Two-way Data Binding [(ngModel)]
- Built-In Directives
  - \*ngFor, \*ngIf
  - ngClass, ngStyle
- Inter-component Communication (@Input/@Output, Event Emitter)

### **3: Forms**

- Template Driven Forms
- Reactive forms
- Form Validations
- Custom Synchronous form validations
- Custom Asynchronous form validations

### **4: Pipes**

- Built-in Pipes
- Custom Pipes

### **5: Services**

- Service as a singleton, data sharing.
- HttpClient, HttpHeaders
- Observables with Operators like the map, subscribe, catch, retry etc
- Subjects
- Sharing data across Components using Service

### **6: Routing**

- Introduction to Routing
- Child routes/ Nested Route
- Route params
- Route Guards - CanActivate, CanDeactivate,
- Feature Module
- Lazy loading implementation

### **7: Implementation of Angular Material**

## **8: Unit Testing**

- Introduction to Unit testing
- Test Component
- Test Services
- Coverage Report

## **9: v16 New Feature**

- Angular Signals
- Required Inputs
- Router Inputs
- Standalone Project Support

## **10: Final Project**
