

# APICS Certified Supply Chain Professional (CSCP)

**Duration: 32 Hours (4 Days)**

## Overview

The APICS Certified Supply Chain Professional (CSCP) course is a comprehensive program designed for supply chain professionals seeking to enhance their knowledge and expertise. It focuses on key concepts, strategies, and best practices necessary to manage a global supply chain effectively. Module 1 delves into the fundamentals of Supply chains, Demand management, and Forecasting, equipping learners with the ability to understand and predict market requirements. Module 2 explores Global Supply Chain Networks, emphasizing the complexities of operating on an international scale. Module 3 addresses strategies for Sourcing products and services, ensuring quality and efficiency. Module 4 covers internal operations and inventory management, a critical aspect of supply chain optimization. Module 5 examines Forward and reverse logistics, essential for product lifecycle management. Module 6 focuses on fostering Supply chain relationships, while Module 7 prepares learners to identify and mitigate Supply chain risk. Finally, Module 8 encourages innovation through optimization, sustainability, and technology integration in Supply chains. Learners who complete the CSCP course will gain a robust understanding of how to create more streamlined, responsive, and resilient Supply chains, positioning them as valuable assets in their organizations.
