MS-4014 Build a foundation to extend Microsoft 365 Copilot

Course description

This course explores how to extend Microsoft 365 Copilot's capabilities through graph connectors and agents, guiding participants through the selection of the most suitable development path. Concluding with the management and distribution of extensions, this course allows learners to explore the Microsoft 365 Admin center for extension administration.

Audience prerequisites

- Familiarity with Microsoft 365, Microsoft Copilot for Microsoft 365, and Microsoft Teams
- Familiarity with Visual Studio Code and the Teams Toolkit.

Day	Estimated Time	Classroom activity
1	60 minutes	Course Introduction slide deck
1	30 minutes	Learning Path 1 - Module 1: Examine the Microsoft 365 Copilot design
1	45 minutes	Learning Path 1 - Module 2: Microsoft 365 Copilot extensibility fundamentals
1	60 minutes	Learning Path 1 - Module 3: Choose a Microsoft 365 Copilot extensibility development path
1	30 minutes	Learning Path 1 – Module 4: Introduction to Graph connectors
1	20 minutes	Learning Path 1 – Module 5: Introduction to declarative agents for Microsoft 365 Copilot

1	30 minutes	Learning Path 1 – Module 6: Manage agents for Microsoft 365 Copilot

Labs

The labs must be completed within the lab environment provided by your lab hosting provider. Detailed step-by-step instructions are provided for each lab and presented as part of the UI experience within your lab environment.
