

Create Apps and Automations with Power Platform

Adapt your skills and master the tools you'll need to thrive in an AI-powered world at a free Microsoft Power Platform Virtual Training Day from Microsoft Learn. Join us at Create Apps and Automations with Power Platform to learn how to accelerate innovation with low-code development tools. Find out how to create efficient canvas apps in Power Apps and learn to deploy seamless automations in Power Automate. You'll also explore how to set up triggers, configure actions, and manage approvals. Discover how to use low-code tools and AI-powered assistance in Microsoft Copilot to simplify, automate, and transform business processes.

Who should attend:

- Application makers
- DevOps and software engineers
- Solution and enterprise architects
- Developers
- IT pros
- Business and data analysts

Technical level:

- This is an intermediate-level course.

During this training, you'll be able to:

- Learn how to build and maintain Power Automate flows that streamline processes.
- Gain insights to design and manage Power Apps canvas apps that boost efficiency.
- Find out how to apply actions and conditional logic for intelligent and responsive cloud flows.
- Discover the steps to test and publish cloud flows and canvas apps with assurance.
- Chat with Microsoft experts—ask questions and get answers on common challenges about creating apps.
