

Rally for Everyone

Course Code: 33RLY20011

Course Description

The *Rally for Everyone* course is designed to be the start of the learning journey for new Rally users.

The course provides introductory-level instruction and material which enables the new user to understand and perform basic and meaningful functions within Rally.

The course also addresses important concepts, principles, and practices, such as, lean-agile, and Scrum, which are the foundation for Rally's wide array of capabilities.

The *Rally for Everyone* course is targeted to a range of Rally Practitioners including, but not limited to; Scrum Masters, Team Leaders, Product Managers, Development Managers, and Senior Leaders.

Delivery Method

Instructor-Led

Duration

One Day

Course Objectives

By the completion of this course, you will be able to:

- Identify the benefits of using Rally
- Distinguish the major modules and functions of Rally
- Navigate through primary and secondary menus
- Recognize and apply the three key dimensions of the Rally data model
- Create, save, and share views
- Compose and update work items
- Compose and apply alerts and notifications
