

Introduction to IBM i for New Users-OE98G

Course Objectives:

After completing this course, you should be able to:

- Explain the functions supported by IBM i operating systems
- Explain Power System with IBM i models and generations
- Explain which applications are supported
- Sign on / off the system
- Use the display station keyboard
- Use the online help that is available
- Use the different interfaces available for IBM i
- Understand how objects are managed
- Enter control language (CL) commands
- Send and receive messages and work with message queues
- Manage work and output
- Explain basic security concepts on IBM i

Prerequisites: There are no prerequisites for this course.

Audience: This course is intended for new users employed in a data processing environment who are new to Power Systems with IBM i.

Course Duration: 1 Day

Course Topics:

- Unit 1 - Introduction and overview to IBM i
- Unit 2 - Using the 5250 emulation interface
 - Exercise 1- Using the 5250 emulation interface
- Unit 3 - Overview of IBM i Access Client Solutions
 - Exercise 2 - Overview of IBM i Access Client Solutions
- Unit 4 - Using IBM Navigator for i
 - Exercise 3 - Using IBM Navigator for i
- Unit 5 - Using the messages function on IBM i
 - Exercise 4 - Using the messages function with a display session
 - Exercise 5 - Using the messages function with IBM Navigator for i
- Unit 6 - Using CL commands on IBM i
 - Exercise 6 - Using CL commands with a display session
 - Exercise 7 - Using CL commands with IBM Navigator for i
- Unit 7 - Managing objects on IBM i
 - Exercise 8 - Object management on IBM i
- Unit 8 - Managing your work on IBM i
 - Exercise 9 - Tracking jobs and printouts on IBM i
- Unit 9 - IBM i security overview
- Unit 10 - Additional education
