

Implement security through a pipeline using Azure DevOps

Implement security through a pipeline using Azure DevOps

7 hr 18 min
7 modules

Modules in this learning path

Configure a project and repository structure to support secure pipelines

1 hr 8 min
Module
6 units

Configure secure access to pipeline resources

58 min
Module
10 units

Manage identity for projects, pipelines, and agents

1 hr 14 min
Module
9 units

Configure and validate permissions

57 min
Module
8 units

Extend a pipeline to use multiple templates

1 hr 3 min
Module
10 units

Configure secure access to Azure Repos from pipelines

1 hr 14 min
Module
9 units

Configure pipelines to securely use variables and parameters

44 min
Module
9 units
