Copilot Studio in a Day formerly PVAIAD

This beginner-level course consists of hands-on, step-by-step lab exercises that guide you through building modern copilot experiences, how to respond rapidly to your customers and employees at scale, using next generational conversational assistants. No matter if you are a business expert or IT developer, you will learn to develop copilots quickly, in a single day using Microsoft Copilot Studio.

At the end of the day, attendees will understand how to:

- Easily create your own copilots.
- Take action quickly with seamless integrations.
- Build copilots using generative AI and specific responses for personalized conversations.

Module	Name
Overview	What is Conversational AI? Introductory Presentation
Module 1: Access and Setup	Access your tenant and preview access
