

Power Pages in a Day

This beginner-level training is designed for users with no prior experience of website creation, app building, or working with Power Platform, to learn how to rapidly build low-code, enterprise-trusted, secure websites with Microsoft Power Pages. This hands-on workshop will walk prospective makers through the end-to-end creation of a Power Pages website including customization of web pages and the creation of Dataverse components to enforce security.

Duration: 8 hours (1 day)

At the end of the day, attendees will better understand how to:

- Successfully build a data-driven website on top of a relational database with automated processes.
- Identify when their organizations can benefit from using Power Pages sites for their specific business scenarios/use cases.

Power Pages Modules

- Welcome & Introductions
- Lab Overview and Prerequisites
- Break
- Power Pages Positioning and Overview
